At the end of this year, I wish to express my sincere gratitude, also on behalf of the other editors, the members of the editorial board and the publisher of the European Journal of Epidemiology, to the referees of the articles considered for the 2019 volume of EJE. Hundreds of busy colleagues have spent their time in assessing the more than 1200 manuscripts submitted to our Journal, in selecting the ones that

may possibly be published, and in improving the quality of the selected articles. Many of the reviewers have helped us in the past years as well, and we are tremendously appreciative and grateful to them [1, 2]. It is largely thanks to them that EJE is doing well in attracting and publishing valuable contributions on epidemiologic research findings and epidemiologic methods.
