## Corrigendum to “Applying circular statistics can cause artefacts in the calculation of vector coding variability: A bivariate solution” [Gait Posture 65 (2018) 51–56]

Holly Stock<sup>a,\*</sup>, Richard van Emmerik<sup>b</sup>, Cassie Wilson<sup>a</sup>, Ezio Preatoni<sup>a</sup>

<sup>a</sup> Department for Health, University of Bath, UK

<sup>b</sup> Department of Kinesiology, University of Massachusetts, Amherst, USA

The authors regret that Equation 5 is missing a square root and should therefore read:

$$X(t) = k \cdot \text{sqrt}(\text{svd}(\lambda(t)))$$

The results presented in the paper used the above formula and not that printed in the original article.

The authors would like to apologise for any inconvenience caused.
