of Norway, Tromsø, Norway

Hans Wohlmut
Southern Cross University; and Integra
Healthcare, Lismore, Australia

Christabelle Yeoh, Australasian College of
Nutritional and Environmental Medicine,
Melbourne, Australia

Tony Zhang
Royal Melbourne Institute of Technology
Melbourne, Australia

Aim & Scope:

AIMED is an international peer-reviewed, evidence-based research and review journal that is multi-disciplinary within the fields of Integrative and Complementary Medicine.

The journal focuses on rigorous quantitative and qualitative research including systematic reviews, clinical trials and surveys, whilst also welcoming medical hypotheses and clinically-relevant articles and case studies disclosing practical learning tools for the consulting practitioner.

By promoting research and practice excellence in the field, and cross collaboration between relevant practitioner groups and associations, the journal aims to advance the practice of IM, identify areas for future research, and improve patient health outcomes.

International networking is encouraged through clinical innovation, the establishment of best practice and by providing opportunities for cooperation between organisations and communities.
