The authors regret there is a typo in one of the accession numbers in Table 1.

In Table 1, the accession number “Z33725.1” under column “Reference (NCBI Accession No.)” should be “Z37725.1”. The same

accession number was also mention under column “NCBI Stx subtype sequence matches (Accession No.)” and it has the correct designation as “Z37725.1”.

The authors would like to apologise for any inconvenience caused.
