TRANSDIAGNOSTIC PERSPECTIVES ON PSYCHIATRIC DISORDERS

IN THIS ISSUE - MARCH 1ST

365 A brief summary of the articles appearing in this issue of *Biological Psychiatry*.

COMMENTARY

366 **Connections With Connections: Dopaminergic Correlates of Neural Network Properties**
Daniel P. Eisenberg and Karen F. Berman
» See corresponding article on page 368

ARCHIVAL REPORTS

368 **Mesolimbic Dopamine Function Is Related to Salience Network Connectivity: An Integrative Positron Emission Tomography and Magnetic Resonance Study**
Robert A. McCutcheon, Matthew M. Nour, Tarik Dahoun, Sameer Jauhar, Fiona Pepper, Paul Expert, Mattia Veronese, Rick A. Adams, Federico Turkheimer, Mitul A. Mehta, and Oliver D. Howes
» See commentary on page 366

379 **Common Dysfunction of Large-Scale Neurocognitive Networks Across Psychiatric Disorders**
Zhiqiang Sha, Tor D. Wager, Andrea Mechelli, and Yong He

389 **Probing Brain Developmental Patterns of Myelination and Associations With Psychopathology in Youths Using Gray/White Matter Contrast**
Linn B. Norbom, Nhat Trung Doan, Dag Alnæs, Tobias Kaufmann, Torgeir Moberget, Jaroslav Rokicki, Ole A. Andreassen, Lars T. Westlye, and Christian K. Tamnes

399 **Neural Profile of Callous Traits in Children: A Population-Based Neuroimaging Study**
Koen Bolhuis, Essi Viding, Ryan L. Muetzel, Hanan El Marroun, Desana Kocevskaja, Tonya White, Henning Tiemeier, and Charlotte A.M. Cecil

408 **Polygenic Risk and Neural Substrates of Attention-Deficit/Hyperactivity Disorder Symptoms in Youths With a History of Mild Traumatic Brain Injury**
Sonja Stojanovski, Daniel Felsky, Joseph D. Viviano, Saba Shahab, Rutwik Bangali, Christie L. Burton, Gabriel A. Devenyi, Lauren J. O'Donnell, Peter Szatmari, M. Mallar Chakravarty, Stephanie Ameis, Russell Schachar, Aristotle N. Voineskos, and Anne L. Wheeler

417 Association of a Noncoding RNA Postmortem With Suicide by Violent Means and In Vivo With Aggressive Phenotypes

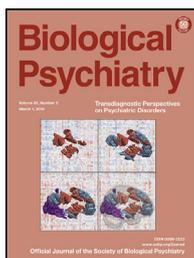

Giovanna Punzi, Gianluca Ursini, Giovanna Viscanti, Eugenia Radulescu, Joo Heon Shin, Tiziana Quarto, Roberto Catanesi, Giuseppe Blasi, Andrew E. Jaffe, Amy Deep-Soboslay, Thomas M. Hyde, Joel E. Kleinman, Alessandro Bertolino, and Daniel R. Weinberger

425 Incentives Boost Model-Based Control Across a Range of Severity on Several Psychiatric Constructs

Edward H. Patzelt, Wouter Kool, Alexander J. Millner, and Samuel J. Gershman

ERRATA

- 434 Erratum to: Cannabinoids and Pain: Weeding Out Undesired Effects With a Novel Approach to Analgesia**
- 434 Erratum to: Reshaping the Depressed Brain: A Focus on Synaptic Health**
- 434 Erratum to: What's All the Hysteria About? A Modern Perspective on Functional Neurological Disorders**

From the work by McCutcheon *et al.* (in this issue, pages 368–378), brain regions making up the salience, default mode, and visual networks, and the connectivity patterns between these networks, are featured on the cover. In this article, the authors used positron emission tomography to measure striatal dopamine function and observed that it is related to functional magnetic resonance imaging measures of salience network connectivity. Artwork created by Robert McCutcheon.
