

ERRATUM

Erratum to ‘Long-term Survival and Risk Analysis in 136 Consecutive Patients With Type B Aortic Dissection Presenting to a Single Centre Over an 11-year Period’ [European Journal of Vascular & Endovascular Surgery 57/5 (2019) 633–8]

Rachel E. Clough ^{a,b}, David Barillà ^a, Pascal Delsart ^a, Guillaume Ledieu ^a, Raffaella Spear ^a, Siobhan Crichton ^c, Claire M. Vehier ^a, Janet Peacock ^c, Jonathan Sobocinski ^a, Stephan Haulon ^{a,d,*}

^a Aortic Centre, CHRU de Lille, France

^b Division of Imaging Sciences and Biomedical Engineering, King’s College London, UK

^c Division of Health and Social Care Research, King’s College London, UK

^d Aortic Centre, Hôpital Marie Lannelongue, Le Plessis-Robinson, Université Paris Sud, France

The publisher regrets that the table and figure legends quoted “type A dissections” instead of “type B dissections”. The correct table and figure legends are:

Table 1: Baseline characteristics of 136 consecutive patients presenting with type B aortic dissection.

Table 2: Anatomical features of 136 consecutive patients with type B aortic dissection, at first presentation and during follow-up.

Figure 1. Kaplan Meier estimate demonstrating 94.4% and 75.5% cumulative overall survival after type B aortic dissection at one and five years, respectively.

Figure 2. Kaplan Meier estimates of cumulative aortic event free survival after type B aortic dissection. The rates at one and five years were 76% and 58%, respectively.

The publisher would like to apologise for any inconvenience caused.
