

Anthony Faiola, PhD, MFA

Dr. Anthony Faiola is Professor and Head of the Dept. of Biomedical and Health Information Sciences at University of Illinois at Chicago. He is a socio-technical scientist whose research lies at the intersection of biomedical/health informatics and human-centered computing (HCI/Human Factors). His focus is on advancing the fields of clinical and consumer health informatics, through the use of mobile health and patient self-monitoring.

Elizabeth Lerner Papautsky, PhD

Dr. Papautsky is a Research Assistant Professor in the Department of Biomedical & Health Information Sciences at University of Illinois at Chicago. She applies human factors principles and approaches to study and improve patient safety and quality, with particular focus on patient-centered care.

Miriam Isola, DrPH

Dr. Isola is a Clinical Assistant Professor in the Department of Biomedical & Health Information Sciences at University of Illinois at Chicago. Her areas of interest involve how healthcare organizations develop analytic capabilities and use analytics for strategic decision-making: defining framework and measurement strategies for improving patient engagement; and organizational change management for implementation and adoption of HIT and data analytics for healthcare transformation.
