Brain & Development

Aims and scope: *Brain & Development* (ISSN 0387-7604) is the Official Journal of the Japanese Society of Child Neurology, and is aimed to promote clinical child neurology and developmental neuroscience.

The journal is devoted to the publication of Review Articles, Original Articles, Case Reports, and Letters to the Editor in the field of child neurology and related sciences. Proceedings of meetings and professional announcements are published at the Editor's discretion. Letters concerning articles published in *Brain & Development* and other relevant issues are also welcome.

Manuscript submission: Manuscripts for publication should be submitted online at <http://ees.elsevier.com/bradev/>. Please refer to the online Guide for Authors for specific information about the preparation of manuscripts at <http://www.elsevier.com/journals/brain-and-development/0387-7604/guide-for-authors>

Publication information: *Brain & Development* (ISSN 0387-7604). For 2019, volume 41 (10 issues) is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Elsevier Customer Service Department nearest you or from this journal's website (<http://www.elsevier.com/locate/braindev>). Further information is available on this journal and other Elsevier products through Elsevier's website (<http://www.elsevier.com>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by Priority Air. Rates are available upon request. Claims for missing issues should be made within six months of date of dispatch.

Funding body agreements and policies: Elsevier has established agreements and developed policies to allow authors whose articles appear in journals published by Elsevier, to comply with potential manuscript archiving requirements as specified as conditions of their grant awards. To learn more about existing agreements and policies please visit <http://www.elsevier.com/fundingbodies>

Cover: Successful hemispherotomy in two refractory epilepsy patients with cerebral hemiatrophy and contralateral EEG abnormalities. Rumiko Takayama, et al. *Brain & Development* 40 (2018) 601–606.
