

Laura Flores, BA, is a current MD-PhD Scholar in the University of Nebraska Medical Center MD-PhD Scholars Program. She received her bachelor's degree from New Mexico State University. Her clinical interests include metabolic and bariatric surgery and eating disorder psychiatry. Her primary research focus is osteoporosis following bariatric surgery.

Crystal Krause, PhD, is a Research Associate in the Center for Advanced Surgical Technology at the University of Nebraska Medical Center. She received her bachelor's degree from Dana College in Blair, Nebraska and completed her doctoral training at the University of Nebraska Medical Center. Her research interests are emerging surgical technology and surgical outcomes.

Bhavani Pokala, MD, is a Resident in General Surgery at the University of Nebraska Medical Center. She received her bachelor's degree from the University of Missouri in Kansas City and her medical degree from the University of Missouri - Kansas City School of Medicine. She then obtained a certificate in Public Health from the University of Nebraska Medical Center. Her current clinical interests include bariatric and minimally invasive surgery, advanced endoscopy, and complex hernia repair. Her research areas of focus are surgical quality improvement and comparative effectiveness with a focus on minimally invasive techniques.

Salim Hosein, MD, is a Fellow in Minimally Invasive and Bariatric Surgery at the University of Nebraska Medical Center. He received his medical degree from Aga Khan University. Dr. Hosein completed his general surgery residency at the Ochsner Clinic in New Orleans. His current clinical interests include metabolic, foregut, and abdominal wall hernia surgery. His research interests include bariatric surgery and strategies to maximize long-term efficacy.

Priscila Rodrigues Armijo, MD, is a Postdoctoral Research Fellow at University of Nebraska Medical Center. She received her medical degree from Federal University of Sao Paulo. Her clinical interests include minimally invasive surgery and its benefits to patients and surgeons. Her primary research focus is on comparative effectiveness of surgical outcomes.

Tripurari Mishra, MD, is a Fellow in MIS/Bariatric at Gundersen Health System in La Crosse, Wisconsin. Dr. Mishra received his medical degree from the University Of Illinois College Of Medicine. Dr. Mishra works in La Crosse, WI and specializes in general surgery.

Shanu Kothari, MD, is the Director of Minimally Invasive Bariatric Surgery at Gundersen Health System, La Crosse, Wisconsin. He received his medical degree from the University of Illinois in Chicago and completed residency at the Gundersen Medical Foundation, La Crosse, Wisconsin. He completed general surgery fellowship training at the Medical College of Virginia in Richmond, Virginia and an internship with the Gundersen Medical Foundation in La Crosse, Wisconsin. His medical interests include LINX minimally invasive GERD treatment, laparoscopic gastric bypass surgery, laparoscopic antireflux surgery, laparoscopic hernia surgery, and surgical disorders of the esophagus and stomach.

Dmitry Oleynikov, MD, is the Chief of Gastrointestinal, Minimally Invasive, and Bariatric Surgery and the Director of the Center for Advanced Surgical Technology at the University of Nebraska Medical Center. He received his undergraduate training from Cornell University in Ithaca, New York and his medical degree from Albert Einstein College of Medicine in the Bronx, New York. He completed general surgery residency at the University of Utah Medical Center and laparoscopic surgery fellowship at the University of Washington School of Medicine. His clinical interests are foregut and hernia surgery. His research is focused primarily in comparative outcomes of minimally invasive surgical technologies, surgical disparities, and surgical robotics.
