The author has realized that all mentions of NP2361 in Table 2 should be corrected to NP2631. Refs. [34] and [41] refer to this enhancer trap line as ‘NP2361’, but discussions with the authors of these references and experimental results have led us to conclude that ‘NP2361’ was a typographical error, and that I have inadvertently propagated this error in this review. Fly-Base will re-associate the above-mentioned articles with the entry for NP2631 (FBti0034959) as well.

The author would like to apologize for any inconvenience caused.
