Meet the Editorial Board Member

Margaret Korzewski, DNP, ANP-BC, SCRNP

I have been working as a nurse practitioner for Interventional Neuroradiology at UC Davis Medical Center in Sacramento, CA, since 2009. I have been a registered nurse since 1998 initially working as a staff nurse in the operating room, and then as a perioperative clinical nurse specialist, before receiving nurse practitioner certification from the American Nurses Credentialing Center. In 2014, I earned a Doctor of Nursing Practice in Healthcare Systems Leadership degree from University of San Francisco.

In addition to routine nurse practitioner's duties, I conduct nursing research and disseminate these findings to internal and external audiences in multiple venues such as podium and poster presentations at the nationwide and worldwide conferences. I previously published in JRN about streamlining the processes regarding the management of patients with acute ischemic stroke undergoing endovascular revascularization therapy. I have been involved in developing the hospital protocols for the management of patients undergoing endovascular therapy for acute ischemic and hemorrhagic stroke.

I am involved in quality and patient safety improvement initiatives and subsequent creation of policies and procedures to enhance the clinical outcomes. I make sure that current nursing practice is based on available evidence. Thus, my role is to be the patient's advocate and advocate for change.
