The authors regret that figure 3 and its legend on p.638 of the paper is incorrect. The corrected figure 3 and legend follow. The authors would like to apologize for any inconvenience caused.

Fig. 3 EMSA of the DGAT1-1 gene promoter region incubated with BnZFP1 protein. Increasing amounts of BnZFP1 protein were added to DGAT1-1 gene promoter region DNA using a final volume of 20 μL of the binding buffer. Each sample was incubated for 30 min before loading onto a 6% non-denaturing polyacrylamide gel. The gel was run for 90 min at 100 V in pre-chilled 0.5× TBE. Lane 1: DNA only (50 ng). Lane 2–6: DGAT1-1 gene promoter DNA in 50 ng aliquots with increasing amounts of BnZFP1 protein (100 ng, 200 ng, 400 ng, 600 ng, and 800 ng). M: DNA ladder.
