Getting the most out of online literature searches—tips for advanced searches

Dirk M. Elston, MD

A Clinician's Perspective

906

Acute inflammatory edema: A swell concept

Warren R. Heymann, MD

Original Articles

908

Factors associated with time to surgery in melanoma: An analysis of the National Cancer Database

Bottom line: Interventions aimed at decreasing the interval between diagnosis and surgery should be targeted to specific populations.

Marissa L. H. Baranowski, BS, Howa Yeung, MD, Suephy C. Chen, MD, MS, Theresa W. Gillespie, PhD, and Michael Goodman, MD, MPH

- 917** Functional surgery versus amputation for in situ or minimally invasive nail melanoma: A meta-analysis
Bottom line: Our meta-analysis showed no significant difference in local recurrence between functional surgery and amputation for in situ or minimally invasive nail melanoma; therefore, functional surgery should be the first treatment for in situ or minimally invasive nail melanoma.
Gwanghyun Jo, MD, Soo Ick Cho, MD, Sungjun Choi, MD, and Je-Ho Mun, MD, PhD
- 923** Patient-reported outcomes of adalimumab, phototherapy, and placebo in the Vascular Inflammation in Psoriasis Trial: A randomized controlled study
Bottom line: Phototherapy and adalimumab both improve skin-related and overall health-related quality of life in patients with psoriasis. Patients treated with phototherapy achieved more improvement in overall health-related quality of life compared with patients treated with adalimumab.
Megan H. Noe, MD, MPH, MSCE, Marilyn T. Wan, MBChB, MPH, Daniel B. Shin, PhD, April W. Armstrong, MD, MPH, Kristina Callis Duffin, MD, MS, Zelma C. Chiesa Fuxench, MD MSCE, Robert E. Kalb, MD, Alan Menter, MD, Eric L. Simpson, MD, Junko Takeshita, MD, PhD, MSCE, Stephen K. Tyring, MD, Abby S. Van Voorhees, MD, Nehal N. Mehta, MD, MSCE, and Joel M. Gelfand, MD, MSCE
- 931** Acute inflammatory edema: A mimicker of cellulitis in critically ill patients
Bottom line: Recognizing and naming this entity allows for a bedside diagnosis and avoidance of a broad, costly workup and treatment.
Elizabeth M. Marchionne, MD, Timothy H. McCalmont, MD, Laura B. Pincus, MD, Philip E. LeBoit, MD, and Lindy P. Fox, MD
- 937** All-cause mortality among patients with hidradenitis suppurativa: A population-based cohort study in the United States
Bottom line: Hidradenitis suppurativa confers an independent increase in risk of all-cause mortality. Risk may be attenuated through early identification and management of comorbid conditions.
Sarah Reddy, BA, Andrew Strunk, MA, and Amit Garg, MD
- 943** Factors associated with patient-reported importance of skin clearance among adults with psoriasis and atopic dermatitis
Bottom line: We identified factors that are associated with patient-reported importance of obtaining complete or almost complete skin clearance.
Alexander Egeberg, MD, PhD, and Jacob P. Thyssen, MD, PhD, DMSc
- 950** Localization and age distribution of telangiectases in children and adolescents with hereditary hemorrhagic telangiectasia: A retrospective cohort study
Bottom line: The established clinical diagnostic criteria are likely less sensitive in the pediatric population with HHT.
Cristian D. Gonzalez, MD, Sarah D. Cipriano, MD, MPH, MS, Christina A. Topham, BS, David A. Stevenson, MD, Kevin J. Whitehead, MD, Sheryll Vanderhoof, MD, Angela P. Presson, PhD, and Jamie McDonald, MS

- 956** Vulvar Paget disease: A national retrospective cohort study
Bottom line: Recurrence rates are about 40%. The risk of development of invasive disease after a diagnosis of noninvasive vulvar Paget disease is 8%. The 5-year disease-specific survival of invasive disease is significantly worse than in noninvasive or microinvasive vulvar Paget disease (50% versus 98%).
Michelle van der Linden, MD, Maaïke H. M. Oonk, MD, PhD, Helena C. van Doorn, MD, PhD, Johan Bulten, MD, PhD, Eleonora B. L. van Dorst, MD, Guus Fons, MD, PhD, Christianne A. R. Lok, MD, PhD, Mariëtte I. E. van Poelgeest, MD, PhD, Brigitte M. F. Slangen, MD, PhD, Leon F. A. G. Massuger, MD, PhD, and Joanne A. de Hullu, MD, PhD
- 963** Prevalence and determinants for xerosis cutis in the middle-aged and elderly population: A cross-sectional study
Bottom line: Sixty percent of those in our community-based population experience dry skin. Determinants and associated diseases vary with extent of the xerosis. Greater body coverage of dry skin is more strongly linked to comorbidity and drug use.
Selma Mekić, MD, Leonie C. Jacobs, MD, PhD, David A. Gunn, PhD, Andrew E. Mayes, PhD, M. Arfan Ikram, MD, PhD, Luba M. Pardo, MD, PhD, and Tamar Nijsten, MD, PhD
- 970** Role of imaging in low-grade cutaneous B-cell lymphoma presenting in the skin
Bottom line: Imaging is effective for identifying the small subset of patients with systemic involvement at staging. After negative initial staging, primary cutaneous marginal zone lymphoma patients may be followed clinically without routine imaging.
Meenal K. Kheterpal, MD, Julia Dai, MD, Shamir Geller, MD, Melissa Pulitzer, MD, Andy Ni, PhD, Patricia L. Myskowski, MD, Alison Moskowitz, MD, Jinah Kim, MD, Eric K. Hong, BS, Sophia Fong, BS, Richard T. Hoppe, MD, Youn H. Kim, MD, and Steven M. Horwitz, MD
- 977** Treatment and survival of Merkel cell carcinoma since 1993: A population-based cohort study in The Netherlands
Bottom line: Our results emphasize need for implementation of new therapies and research in this field.
Sanne E. Uitentuis, MD, Marieke W. J. Louwman, PhD, Alexander C. J. van Akkooi, MD, PhD, and Marcel W. Bekkenk, MD, PhD

Dermatologic Surgery

- 984** Reflectance confocal microscopy-guided carbon dioxide laser ablation of low-risk basal cell carcinomas: A prospective study
Bottom line: Reflectance confocal microscopy can better guide nonsurgical basal cell carcinoma treatment modalities, ultimately improving treatment efficacy.
Cristian Navarrete-Dechent, MD, Miguel Cordova, MD, Konstantinos Liopyris, MD, Oriol Yélamos, MD, Saud Aleissa, MD, Brian Hibler, MD, Heidi Sierra, PhD, Aditi Sahu, PhD, Nina Blank, MD, Milind Rajadhyaksha, PhD, and Anthony Rossi, MD

-
- Dermatopathology** **989** Cutaneous angioimmunoblastic T-cell lymphoma: Epstein-Barr virus positivity and its effects on clinicopathologic features
Bottom line: EBV-positive cutaneous angioimmunoblastic T-cell lymphoma is associated with distinct clinicopathologic features but there is no difference in survival between EBV-positive and EBV-negative cutaneous angioimmunoblastic T-cell lymphoma patients.
Woo Jin Lee, MD, PhD, PhD, Kwang Hee Won, MD, Jae Won Choi, MD, Chong Hyun Won, MD, PhD, Sung Eun Chang, MD, PhD, Jee Ho Choi, MD, PhD, and Mi Woo Lee, MD, PhD
-
- From the Academy** **998** Commentary: Position statement on augmented intelligence (AuI)
Carrie Kovarik, MD, Ivy Lee, MD, and Justin Ko, MD, on behalf of Ad Hoc Task Force on Augmented Intelligence
-
- Review** **1001** Dermatologic manifestations associated with electronic cigarette use
Bottom line: Dermatologists should be more cognizant of electronic cigarette use when taking a social history of patients presenting with new oral lesions, contact dermatitis, or burn injuries.
Michael J. Visconti, BSc, and Kurt A. Ashack, MD
-
- Research Letters** **1008** Moonlighting policies among US dermatology residency programs: A survey
Kishore L. Jayakumar, BS, and Jules B. Lipoff, MD
- 1009** Incidence and risk of developing photosensitivity with targeted anticancer therapies
Kathryn T. Ciccolini, MSN, AGACNP-BC, OCN, DNC, Joseph Kim, BA, Soham P. Chaudhari, DO, Anna Skripnik Lucas, DNP, FNP-BC, DNC, CWON-AP, Benjamin Benhuri, MD, Juanita Duran, MD, Shenhong Wu, MD, PhD, and Mario E. Lacouture, MD
- 1011** Determining patient preferences and willingness to pay related to scar length and appearance after skin cancer treatment on the face and trunk: A multicenter discrete choice experiment
Nicholas Golda, MD, William Black, MD, Vishal Patel, MD, Donald Neal, BA, and Jeremy Etzkorn, MD
- 1013** Intralesional sodium stibogluconate under inhaled anesthesia for the treatment of cutaneous leishmaniasis in children: A retrospective cohort
Yael Renert-Yuval, MD, Claes D. Enk, MD, Sari Murad, MD, Valerie Yofe, MD, David Gozal, MD, and Vered Molho-Pessach, MD
- 1015** Skin cancer risk factors and screening among sexual minority and heterosexual women
Howa Yeung, MD, Marissa L. H. Baranowski, BS, and Suephy C. Chen, MD, MS
- 1018** Limitations of generalizability and reproducibility of systematic reviews in dermatology
Yik Weng Yew, MBBS, MPH, and Jonathan I. Silverberg, MD, PhD, MPH

- 1019** Prison malpractice litigation involving dermatologists: A cross-sectional analysis of dermatologic medical malpractice cases involving incarcerated patients during 1970-2018
Raghav Tripathi, MPH, Rishabh S. Mazmudar, BS, Harib H. Ezaldeen, MD, Jeremy S. Bordeaux, MD, MPH, and Jeffrey F. Scott, MD
- 1021** Pressure alopecia in pediatric and adult patients: Clinical and trichoscopic findings in 12 cases
Giulia Maria Ravaoli, MD, Michela Starace, MD, Aurora Maria Alessandrini, MD, Federica Guicciardi, MD, and Bianca Maria Piraccini, MD
- 1023** Chronic nonscarring scalp folliculitis: Retrospective case series study of 34 cases
Alberto Romero-Maté, MD, Dolores Arias-Palomo, MD, Almudena Hernández-Núñez, PhD, Susana Córdoba-Guijarro, MD, and Jesús Borbujo-Martínez, PhD
- 1024** A new 1-sided nail brace for ingrown toenails of lesser toes
Hsiao-Han Wang, MD, Tsung-Yu Tsai, MD, Che-Wei Liu, MD, and Yu-Chen Huang, MD
- 1025** Patients left behind: Rare dermatologic conditions miss the orphan drug development boom
Afton Chavez, MD, Greg Licholai, MD, MBA, and Dédée F. Murrell, MA, BMBCh, MD, FACD, FRCP(Edin)
- 1027** Utilization of bacterial cultures in dermatology
Amanda Bienenfeld, MD, Efe Kakpovbia, BA, Lauren Penn, MD, and Arielle R. Nagler, MD
- 1028** Sunscreen may prevent the development of basal cell carcinoma in individuals with basal cell carcinoma nevus syndrome: A retrospective survey study
Reid A. Waldman, MD, and Jane M. Grant-Kels, MD
- 1030** Counting keratinocyte carcinomas as a step to preventing them
Meghan Beatson, BS, Angelica Misitzis, MD, and Martin A. Weinstock, MD, PhD
