^g Department of Stebicef, Università degli Studi di Palermo, Via Archirafi, Palermo, Italy

^h Division of Pathology, ICAR—Indian Veterinary Research Institute, Izatnagar, Bareilly, Uttar Pradesh, India

This article has been retracted: please see Elsevier Policy on Article Withdrawal (<https://www.elsevier.com/about/our-business/policies/article-withdrawal>).

The article has been retracted at the request of the Editors-in-Chief. The article duplicates significant parts of a paper that had already appeared in Soltani, M., Ghasemi, M., Sharifrohani, M., Sharifpour, I. and Zorrieh Zahra, J., Isolation and identification of Betanodavirus causing mass mortalities in golden grey mullet (*Liza auratus*) in the Caspian Sea, Iranian Journal of Veterinary Medicine (International Journal of Veterinary Research), 2010; 4(3); 201–2018 DOI: 10.22059/IJVM.2010.21354 The duplication involves the following figures: Figure 5 (Figure 9 in previous paper), Figure 10 (Figure 12 in previous paper), Figure 11 (Figure 11 in previous) and Figure 13 (Figure 10 in

previous paper).

The reuse of these figures was not disclosed when the paper was submitted to Veterinary Microbiology and the Iranian Journal of Veterinary Medicine (International Journal of Veterinary Research) paper was not included in the reference list.

One of the conditions of submission of a paper for publication is that authors declare explicitly that the paper has not been previously published and is not under consideration for publication elsewhere. Re-use of any data should be appropriately cited. As such this article represents a misuse of the scientific publishing system. The scientific community takes a very strong view on this matter and apologies are offered to readers of the journal that this was not detected during the submission process.
