Corrigendum

Corrigendum to “Direct vertical transmission of ESBL/pAmpC-producing *Escherichia coli* limited in poultry production pyramid” [Vet. Microbiol. 231 (2019) 100–106]

Paula E. Oikarainen<sup>a,\*</sup>, Leena K. Pohjola<sup>b</sup>, Eeva S. Pietola<sup>a</sup>, Annamari Heikinheimo<sup>a</sup>

<sup>a</sup> Department of Food Hygiene and Environmental Health, Faculty of Veterinary Medicine, University of Helsinki, Agnes Sjöberginkatu 2, 00790, Helsinki, Finland

<sup>b</sup> HKScan Oyj, P.O. Box 50, 20521, Turku, Finland

The authors regret that there was an error in their article in the Results section, under title “3.1.2. *Escherichia coli* without antibiotic supplement”.

The first line of this section should have read:

*E. coli* was found on MacConkey plates without antibiotic supplement in 25 parent birds (83.3%), 13 outer eggshells prior to the incubation period (65%), and in two chick intestines (0.5%), whereas none of the outer eggshells after the incubation period were positive for

*E. coli*.

The incorrect line had read:

*E. coli* was found on MacConkey plates without antibiotic supplement in 25 parent birds (83.3%), 17 outer eggshells prior to the incubation period (85%), and in two chick intestines (0.5%), whereas none of the outer eggshells after the incubation period were positive for *E. coli*.

The authors would like to apologise for any inconvenience caused.
