The authors regret to note an error in the abstract of our article, “The cyclical of government health expenditure and its effects on population health”, which appeared in Health Policy, vol. 123, page 96–103. In the Abstract, the following appeared: “Further, countries in which GHE [government health expenditure] is less procyclical appear to have shorter life expectancies and higher adult mortality rates.” The words “less procyclical” should be changed to “more procyclical”.

The authors would like to apologise for any inconvenience caused.
