

# Human PATHOLOGY

VOLUME 94

December 2019

## PROGRESS IN PATHOLOGY

- 29** The Evolving Landscape of HPV-Related Neoplasia in the Head and Neck  
*Kyle M. Devins, Michael T. Tetzlaff, Zubair Baloch, and Virginia A. LiVolsi*

## ORIGINAL CONTRIBUTIONS

- 1** Loss of ARID1A Expression Is Associated with DNA Mismatch Repair Protein Deficiency and Favorable Prognosis in Advanced Stage Surgically Resected Esophageal Adenocarcinoma  
*Brett M. Lowenthal, Katie S. Nason, Arjun Pennathur, James D. Luketich, Reetesh K. Pai, Jon M. Davison, and Changqing Ma*
- 11** PAX8 Positivity in Nested Variant of Urothelial Carcinoma: A Potential Diagnostic Pitfall  
*Teklu Legesse, Andres Matoso, and Jonathan I. Epstein*
- 16** Pathological Risk Factors for Metastatic Disease at Presentation in Testicular Seminomas with Focus on the Recent pT Changes in AJCC TNM Eighth Edition  
*Glenda Scandura, Thomas Wagner, Luis Beltran, Constantine Alifrangis, Jonathan Shamash, and Daniel M. Berney*
- 23** *RUNX2* (6p21.1) Amplification in Osteosarcoma  
*Sounak Gupta, Tatsuo Ito, Deepu Alex, Chad M. Vanderbilt, Jason C. Chang, Nasrin Islamdoust, Yanming Zhang, Khedoudja Nafa, John Healey, Marc Ladanyi, and Meera R. Hameed*
- 40** Keratin 17 Is a Negative Prognostic Biomarker in High-Grade Endometrial Carcinomas  
*Ji Dong K. Bai, Sruthi Babu, Lucia Roa-Peña, Wei Hou, Ali Akalin, Luisa F. Escobar-Hoyos, and Kenneth R. Shroyer*
- 51** Interobserver Variability in Breast Carcinoma Grading Results in Prognostic Stage Differences  
*Kimmie Rabe, Olivia L. Snir, Veerle Bossuyt, Malini Harigopal, Romulo Celli, and Emily S. Reisenbichler*
- 58** Primary Adenocarcinoma of the Bladder Lacks Mismatch Repair Deficiency and Demonstrates PD-L1 Expression in Tumor-Infiltrating Immune Cells, with Implications in both Diagnosis and Therapeutics  
*Derek Jones, Jia Jun Guan, Carla Calagua, Donna E. Hansel, Jonathan I. Epstein, and Huihui Ye*
- 64** Predictive Value of WHO Classification for PD-L1 and Her2/Neu Expression and Distinct Associations with Protein Expression Based Classification in Gastric Carcinoma  
*Namrata Setia, Sangjeong Ahn, Hye S. Han, Do Youn Park, and Gregory Y. Lauwers*

(Continued on following page)

### NOTICE TO CONTRIBUTORS

All manuscript submissions to HUMAN PATHOLOGY should be submitted electronically to <http://ees.elsevier.com/yhupa>. Authors with circumstances that prevent online submission should send inquiries to the following address: Chris Reyes, Managing Editor, [cmreyes@wisc.edu](mailto:cmreyes@wisc.edu). Additional contact information: Tel: 608-262-1868; Department of Pathology and Laboratory Medicine, University of Wisconsin–Madison, 1300 University Ave., 521 SMI, Madison, WI 53706-1510, USA.

Cover legend: From the article by Dr. Gupta and colleagues “*RUNX2* (6p21.1) amplification in osteosarcoma,” fluorescence in situ hybridization demonstrating amplification of *RUNX2* in an osteosarcoma (p. 23).

(Contents continued)

- 71** Revisiting Multifocal Breast Cancer: A Clonality Study of Ductal Carcinoma Using Whole Exome Sequencing  
*Christopher J. Schwartz, Igor Dolgalev, Varshini Vasudevaraja, Stephen Kelly, Adriana Heguy, Matija Snuderl, Paolo Cotzia, George Jour, and Farbod Darvishian*
- 78** Loss of ATRX Expression Predicts Worse Prognosis in Pulmonary Carcinoid Tumors  
*Simone B.S.P. Terra, Hao Xie, Jennifer M. Boland, Aaron S. Mansfield, Julian R. Molina, and Anja C. Roden*
- 92** ADAM3A Copy Number Gains Occur in a Subset of Conjunctival Squamous Cell Carcinoma and its High Grade Precursors  
*M. Adelita Vizcaino, Abeer Z. Tabbarah, Laura Asnaghi, Azza Maktabi, Allen O. Eghrari, Divya Srikumaran, Charles G. Eberhart, and Fausto J. Rodriguez*
- 98** Intratumoral Heterogeneity and Loss of ARID1A Expression in Gastric Cancer Correlates with Increased PD-L1 Expression in Western Patients  
*Julia Maria Tober, Christine Halske, Hans-Michael Behrens, Sandra Krüger, and Christoph Röcken*
- CASE STUDY**
- 86** Plasmacytoid Acinar Adenocarcinoma of the Prostate: A Newly Described Variant of Prostate Cancer  
*Turki Al-Hussain, Michael C. Haffner, Waleed M. Altaweel, and Jonathan I. Epstein*
