

POSTER PRESENTATIONS – ENA EMERGENCY NURSING 2019

The following pages list the many evidence-based practice and research posters presented at Emergency Nursing 2019, the annual conference of the Emergency Nurses Association. Contact information is provided with the permission of the poster authors. Our intent in publishing this list is three-fold:

- To inform the ENA membership and emergency care providers everywhere about the work being done by emergency nurses to positively influence the care of emergency patients
- To provide an opportunity for collaboration between and among emergency nurses with similar research or practice improvement endeavors and ideas
- To recognize the accomplishments of emergency nurses who have completed these projects and willingly share the results of their work

The *Journal of Emergency Nursing* is proud to provide this information and recognition and will plan to continue to do so following each ENA annual conference.
