SENIOR REVIEWERS

Our peer reviewers contribute their talent and many hours of their time to ensure the quality of science in our journal. Every year we compile a list of the Top Reviewers, who are chosen based on a formula that ranks them on their total performance in timeliness, review quality, and volume of reviews performed. Reviewers who have appeared on the annual Top Reviewers list twice or more in the last 4 years are truly the best of the very best, and to recognize their contribution we list them on our masthead each month as Senior Reviewers.
