Preface: Anesthesia Practice on the Rise	xix
Richard P. Dutton, Thomas M. McLoughlin Jr, Francis V. Salinas, and Laurence C. Torsher	
Perioperative Blood Conservation: Guidelines to Practice	1
Jenny Kwak, Andrew L. Wilkey, Mohamed Abdalla, Ravi Joshi, Philip E.F. Roman, and Philip E. Greilich	
Introduction	2
Formulating clinical practice guidelines	2
Clinical research: an early barrier	2
Cost and time considerations	4
Conflict of interest	4
Differences in grading systems	4
Other barriers to clinical practice guideline formulation	5
Implementing clinical practice guidelines	6
Peer, practice, and organizational influences	8
Audit and feedback	8
Educational outreach	8
Clinical decision support	9
Translating blood conservation guidelines to practice	9
Use of an implementation science-based approach	12
Implementation strategy for patient blood management	13
High opportunity areas for perioperative blood conservation:	
lessons from cardiac surgery	17
Implementation of a preoperative anemia management program	17
Development of a management team and engagement with stakeholders	19
Planning the intervention	19
Treatment pathway	19
Strategy for surveillance and monitoring	20
Infrastructure and cost	21
Performance evaluation	21
Use of a survey instrument to drive local and national perioperative blood conservation	22
Transfusion algorithms	24

Leveraging common interest in restrictive transfusion	24
Peer-to-peer learning collaboratives	24
Summary	25
Acknowledgments	25
Appendix 1: Standards for Developing Trustworthy Clinical Practice Guidelines	32
Standard 1	32
Establishing transparency	32
Standard 2	32
Management of conflict of interest (COI)	32
Standard 3	33
Guideline development group composition	33
Standard 4	33
Clinical practice guideline–systematic review intersection	33
Standard 5	33
Establishing evidence foundations for and rating strength of recommendations	33
Standard 6	33
Articulation of recommendations	33
Standard 7	34
External review	34
Standard 8	34
Updating	34

Malignant Hyperthermia: A Clinical Review **35**

Kyeong Seon M. Kim, Robert Scott Kriss, and Timothy J. Tautz

Introduction	35
Pathophysiology	36
Clinical description	37
Treatment	38
Recrudescence	40
Epidemiology	40
Incidence/mortality	41
Genetics	42
Contracture testing	42
Pediatrics, associated diseases, and comorbidity	43
Special scenarios/differential diagnosis	48
Summary	48

History, Current State, and Future of Diversity in the Anesthesia Workforce **53**

Melissa R. Kenevan and Bhargavi Gali

Introduction	53
Diversity in medicine	54
Diversity in anesthesiology	56
Current efforts to improve diversity and inclusion	58
Future strategies to improve diversity and inclusion	60
Summary	60

Perioperative Management and Analgesia for Patients Taking Buprenorphine and Other Forms of Medication-Assisted Treatment for Substance Abuse Disorders **65**

Elizabeth Scholzen, Angela M. Zeng, and
Kristopher M. Schroeder

Introduction	66
Buprenorphine	67
Perioperative management	68
Methadone	70
Perioperative management	72
Naltrexone	73
Perioperative management	74
The perioperative surgical home	75
Nonopioid pharmacologic mechanisms to treat pain	77
Regional anesthesia	77
Intravenous lidocaine	79
Acetaminophen	79
Ketamine	79
Dexamethasone	80
Esmolol	80
Gabapentin	81
Alpha-2 agonists	81
Magnesium	81
Nonsteroidal anti-inflammatory drugs	81
Opioids	82
Summary	82

Tranexamic Acid in the Perioperative Period: Yes, No, Maybe? **87**

Justin E. Richards, Ron E. Samet, A. Kennedy Koerner, and
Thomas E. Grissom

Introduction	88
Background	88
Pharmacology	90
Pharmacodynamics	90
Pharmacokinetics	91
Clinical considerations with tranexamic acid	91
Obstetrics	91
Liver transplantation surgery	93
Orthopedic surgery	94
Cardiac surgery	96
Trauma and hemorrhage	97
Summary	104

The Future of Anesthesia Practice: Pro-Pro-Pro **111**

Richard P. Dutton, Robert Isaak, Brian J. Cammarata, and
David A. Zvara

Introduction	111
Academic anesthesia practice	113
The educational mission	114
The research mission	115
The future of academic anesthesiology	116
Small- to medium-sized group partnership	117
Introduction	117
Benefits	117
Limitations	119
Summary: Small Group Practice	120
Large-group practice	120
Introduction	120
Benefits	122
Limitations	124
Summary: Large Group Practice	125
Summary	125

Preoperative Patient Preparation, Programs, and Education in the United States: State of the Art, State of the Science, and State of Affairs **127**

Solomon Aronson, Mike P.W. Grocott, and Michael (Monty) G. Mythen

Introduction	128
Preoperative patient preparation: state of the science	129
Programmatic approaches to preoperative patient preparation in the United States: state of the art	132
Brigham and Women's Hospital	133
The Cleveland Clinic	133
Duke University Health System	133
The University of Michigan and Michigan Surgical and Health Optimization Program	135
University of Texas at Austin, Dell Medical School	135
The University of Texas MD Anderson Center	136
University of Washington: strong for surgery	136
Perioperative education: state of affairs	136
Morpheus fellowship	138
International programs in perioperative management	138
The International Board of Perioperative Medicine	139
Summary	140

Anesthesia Informatics in 2018 **145**

Allan F. Simpao and Mohamed A. Rehman

Introduction	145
An overview of clinical and anesthesia informatics from the 1990s to 2018	146
The evolution from paper records to anesthesia information management systems	148
Anesthesia information management systems and integrated electronic health records in 2018	148

Clinical decision support in anesthesia information management systems and electronic health records	153
Secondary uses of anesthesia information management system and electronic health record data	154
Analytical approaches to anesthesia information management system and electronic health record data	155
The future of anesthesia informatics	157

Spinal Cord and Peripheral Nerve Stimulation for Painful Disorders **163**

William David Mauck, Christine L. Hunt, Oludare O. Olatoye, Nafisseh S. Warner, and Tim J. Lamer

Introduction: nature of the problem	163
Indications and contraindications	164
Spinal cord stimulation	164
Failed back surgery syndrome	166
Complex regional pain syndrome	166
Diabetic peripheral neuropathy	166
Low back pain	167
Refractory angina pectoris	167
Spinal cord stimulation: contraindications	167
Peripheral nerve stimulation	168
Therapeutic options and surgical techniques	169
Spinal cord stimulation	169
Conventional spinal cord stimulation	170
High-frequency spinal cord stimulation	171
Dorsal root ganglion stimulation	172
Peripheral nerve stimulation	173
Clinical outcomes	175
Spinal cord stimulation outcomes	175
Peripheral nerve stimulation outcomes	177
Complications and adverse events	179
Summary and future considerations	179
The future of spinal cord and peripheral nerve stimulation therapies	179
Summary	182

Ultrasound-Guided Fascial Plane Blocks of the Thorax: Pectoral I and II, Serratus Anterior Plane, and Erector Spinae Plane Blocks **187**

Ki Jinn Chin, Amit Pawa, Mauricio Forero, and Sanjib Adhikary

Introduction	188
Anatomic considerations	188
Ultrasound-guided peripheral nerve block techniques	189
General considerations	189
Local anesthetic dosing	190
Pectoral I and II blocks	191
Positioning and approach	191
Technical steps	193

Clinical pearls	193
Potential complications	193
Serratus anterior plane block	193
Positioning and approach	195
Technical steps	195
Clinical pearls	196
Potential complications	196
Erector spinae plane block	196
Positioning and approach	196
Technical steps	198
Clinical pearls	198
Clinical indications, contraindications, and current evidence	199
Pectoral I and II blocks	199
Serratus anterior plane block	200
Erector spinae plane block	200
Current controversies and future considerations	201
Summary	201

Optimal Management of Hypotension During Cesarean Delivery Under Spinal Anesthesia **207**

Jennifer L. Fichter and Kenneth E. Nelson

Introduction	207
Hypotension during spinal anesthesia	208
Maternal positioning	210
Ephedrine versus phenylephrine	212
Phenylephrine infusion versus bolus	213
Other vasopressors	215
Fluid management	217
Preload versus coload: crystalloid	217
Preload versus coload: colloid	217
Varied fluid preloading versus coload combinations	218
Serotonin antagonists	219
Lower extremity manipulation	220
Hypotension management in nonelective, high-risk pregnancies	221
Summary and future directions	222
