
2018 Star Reviewers for *Urologic Oncology*

While the value of any medical journal depends upon the quality of manuscripts received, the backbone of a journal's success is created by those who review manuscripts, identify problematic issues, make critical suggestions for improvement, and assist the journal's editors in deciding on a manuscript's disposition. This is no small task, and all too often it may feel thankless.

By acknowledging those reviewers whom our editors have identified as “Star Reviewers,” *Urologic Oncology* seeks to underscore the outstanding work that these reviewers have done for the Journal over the course of this past year. We also wish to identify and thank *all* reviewers for their excellent work and contributions in 2018. The April 2019 issue of *Urologic Oncology* will therefore continue its tradition of recognizing its reviewers such that all of our 2018 Reviewers and the Editors' “Star Reviewers” will be formally acknowledged in the Journal with deep gratitude.

By providing your expertise, perspectives, knowledge, and insight, you – our reviewers – help immeasurably to enhance the value of *Urologic Oncology* to the readership as well as to those who contribute their work to the Journal. In this, simple words cannot adequately express the gratitude that I and my co-Editors deeply feel.

So, simply said, a big THANK YOU from us all.

The Editors and Publisher of *Urologic Oncology: Seminars and Original Investigations*,
