The authors regret that the reference Huang, S.H., Law, C.H., Kuo, P.H., Hu, R.Y., Yang, C.C., Chung, T.W., et al., 2016. MMP-13 is involved in oral cancer cell metastasis. *Oncotarget* 7 (13), 17144–17161, was retracted by *Oncotarget*. The information regarding MMP-13 induces the expression of vimentin, Twist and Snail in the text and in figure 4, must be not considered as a truthful information until new research is done in this regard. Moreover, Wnt5a and Ror2 are

upregulated by Snail and the activation of the Wnt5a-Ror2 induces MMP-13 synthesis (Ren, D., Minami, Y., Nishita, M., 2011. Critical role of Wnt5a-Ror2 signaling in motility and invasiveness of carcinoma cells following Snail-mediated epithelial-mesenchymal transition. *Genes Cells* 16 (3), 304–315).

The authors would like to apologise for any inconvenience caused.
