From 2020 (Volume 43) *Australasian Physical & Engineering Sciences in Medicine* will undergo a name change to *Physical and Engineering Sciences in Medicine*.

The name change involves removing *Australasian* from the title, as well as changing & to *and*. The second change is obviously minor and the purpose is to limit confusion and incorrect citations, and would not have occurred if not for the first change.

The removal of *Australasian* from the title occurs for several reasons, but essentially it reflects that the journal has evolved from being a local medical physics journal, as outlined in Kenneth Clarke's editorial [1], into an international multidisciplinary journal for both physics and engineering in medicine.

The journal will retain its very broad scope and accept and publish manuscripts covering a broad range of topics which highlight physics and engineering in medicine.
