Aims and scope

Annals of Anatomy publish peer reviewed original articles as well as brief review articles. The journal is open to original papers covering a link between anatomy and areas such as

- molecular biology
- cell biology
- reproductive biology
- immunobiology
- developmental biology, neurobiology
- embryology as well as
- neuroanatomy
- neuroimmunology
- clinical anatomy
- comparative anatomy
- modern imaging techniques
- evolution, and especially also
- aging

Moreover, manuscripts dealing with all forms of anatomical teaching and new forms of curricula will be considered for publication. Priority will be given to experimental studies; merely descriptive studies will only be published if the Editors consider that they are of functional significance.

For more than a century the Annals of Anatomy have been one of the most famous and widespread journals on morphology. The journal is the official journal of the **Anatomische Gesellschaft (Anatomical Society)**.

Abstracted/Indexed in

BIOSIS database; CAB Abstracts database; Chemical Abstracts Service (CAS); Current Advances in Cell and Developmental Biology; Current Contents/Life Sciences; Elsevier BIOBASE/Current Awareness in Biological Sciences; EMBASE/Excerpta Medica; MEDLINE; NISC - National Information Services Corporation; Research Alert; Science Citation Index; SciExpanded; SciSearch. Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®.
