Jennifer H. Kuo, MD, MS, is Assistant Professor of Surgery at Columbia University. Dr. Kuo received her medical degree from the College of Physicians and Surgeons at Columbia University. She completed general surgical training at the University of California, Davis Medical Center and an endocrine surgery fellowship at Columbia University. Her research interests focus on clinical outcomes in endocrine surgery.

Catherine McManus, MD, is a resident in general surgery at the New York Presbyterian-Columbia University Medical Center. She received her Bachelor of Science and Medical Degrees at the University of Wisconsin. During her surgical residency she earned her Masters in Science for Biostatistics at the Columbia University Mailman School of Public Health. After residency, she will remain at Columbia University for an endocrine surgery fellowship. Her current research focuses on clinical outcomes for patients with surgical endocrinopathies.

Claire E. Graves, MD, is a resident in general surgery at New York Presbyterian Hospital/Columbia University Medical Center. She received her medical degree from Mount Sinai School of Medicine and, during residency, completed a research fellowship in pediatric surgery and surgical innovation at the University of California, San Francisco. She will return to UCSF for a fellowship in endocrine surgery. Her research interests include diseases of the thyroid and parathyroid, as well as surgical innovation and device development.

Amin Madani, MD, PhD, received his undergraduate degree from the University of Toronto, his medical degree from Western University, and general surgery training at McGill University. He is currently completing an endocrine surgery fellowship at Columbia University. During residency, he completed a PhD in surgical education and a research fellowship in surgical innovation. His research focus is in the optimization of performance in the operating room, including qualitative methodologies to understand expert mental models and developing technology-enhanced learning environments to improve training and patient outcomes.

Mamoona T. Khokhar, MD, is Assistant Professor of Surgery in the Division of Endocrine Surgery at Banner University Medical Center Phoenix. She finished a 7-year medical program at The College of New Jersey and New Jersey Medical School. She completed general surgery residency at Brown University and an endocrine surgery Fellowship at Columbia University. In addition to her clinical interest in endocrine surgical disorders, she has been invested in surgical education and its research.

Bernice Huang, MD, is a general surgery resident at the New York Presbyterian-Columbia University Medical Center. She earned her Bachelor of Science in biological engineering from the Massachusetts Institute of Technology and her medical degree from the University of Pittsburgh. She is currently a research fellow under the mentorship of Dr. Jennifer Kuo at Columbia University. Her research interests include risk stratification of thyroid nodules and technical innovations in surgery.

James A. Lee, MD, is the Edwin K. and Anne C. Weiskopf Professor of Surgery, Chief of Endocrine Surgery, and Vice Chair of Strategic Communications in the Columbia University Department of Surgery. He serves as the Surgical Director of the Columbia Thyroid, Adrenal, and Parathyroid Centers, and is a nationally recognized leader in comprehensive endocrine surgery. His research focuses on using multimedia formats in surgical education.
