Introduction	xix
Carol D. Berkowitz	
The Promise of Precision Population Health: Reducing Health Disparities Through a Community Partnership Framework	
Anda K. Kuo, Nicole M. Summers, Sameer Vohra, Robert S. Kahn, and Kirsten Bibbins-Domingo	
Precision medicine and population health	3
Community research partnerships and reducing health disparities	5
Precision population health and community-partnered research	6
Surveillance and detection	6
Predicting risk	8
Targeting interventions	8
The role of academic institutions	9
Precision population health framework: ethical considerations and challenges	10
Moving forward	11
Acknowledgments	11
The Need to Integrate Sex and Gender Differences into Pediatric Pedagogy	
Janice L. Werbinski, Mary K. Rojek, and Maria Demma I. Cabral	
Introduction	16
Every cell has a sex and every person has a gender	16
Sex and gender terminology	16
What sex and gender based health is not	17
Implicit bias in practice	17
Sex and gender based health	17
The sex and gender based health differences movement	18
What does this have to do with pediatrics?	19
	xi

Fetal development and hormones: a review of human embryology	19
Sex differences in the brain	24
Sex and gender differences in adults	24
What is known about sex differences in pediatrics?	26
Where to go when you want to know	28
What can you do right now?	30
Future implications	30

Gene Therapy: Current Applications and Future Possibilities

David H.M. Steffin, Emily M. Hsieh, and Rayne H. Rouce

Introduction	37
Successful examples of gene therapy used to treat diseases	38
Gene therapy for hereditary diseases	39
Inherited immunodeficiencies	39
Leber congenital amaurosis	41
Neurologic disorders	41
Lysosomal storage diseases	42
Inherited hematologic diseases	42
Nonviral gene therapies: cystic fibrosis as a model	44
Gene therapy for acquired diseases	44
Success in treating cancer	46
Gene editing and gene therapy of the future	47
Safety	49
Genotoxicity due to retroviral vectors	49
Inflammatory responses to chimeric antigen receptor T cells	50
Ethics	50
Future directions	51

Pediatric Telehealth: Approaches by Specialty and Implications for General Pediatric Care

Alan Tomines

Introduction	55
Terminology	56
Drivers	58
Selected examples by telehealth category and pediatric specialty	60
Teleconsultations: addressing specialty access	61
Telecare: managing chronic conditions	64
Telehealth in public health: protecting populations	67
Telepractice: transforming the physician-patient relationship	69
Telepractice: changing the game for general pediatric care	72
Discussion	73
Telehealth approaches by specialty	73
Telehealth in general pediatrics	74
Telemedicine practice considerations	75
Summary	77

Health Considerations for Immigrant and Refugee Children

Abigail L.H. Kroening and Elizabeth Dawson-Hahn

Introduction	87
Migration history	88
Physical health	90
Chronic disease	91
Nutrition	91
Oral health	93
Immunizations and infectious diseases	93
Exposures	94
Developmental health	98
Behavioral/mental health	100
Screening for trauma	100
Influence of acculturation	101
Considerations of changing social support structure	102
Resilience	102
Vicarious trauma/secondary traumatic stress	103
Education	103
Early childhood education	103
Elementary and secondary education	103
Summary	104

The Essentials of Essential Oils

Rebecca M. Plant, Lisa Dinh, Shaara Argo, and Monica Shah

Introduction	111
Manufacturing and marketing	111
The law	112
Oils most commonly used (Box 1)	112
Clove oil	112
Eucalyptus oil	113
Lavender oil	113
Nutmeg oil	113
Peppermint oil	114
Tea tree oil	114
Oils that are highly dangerous to children (Box 2)	114
Camphor Oil	114
Oil of Wintergreen	115
Treatment and laboratory tests	115
The evidence of efficacy	115
Evidence for anxiolysis	115
Evidence for pain control	117
Evidence for molluscum contagiosum	117
Evidence for treatment of lice	118
Evidence for apnea in premature infants	118
Evidence for irritable bowel syndrome	119
National poison control data	120
Acknowledgments	121

Feeding Issues in Young Children

Melissa Harada, Nelly Amariglio, Hope Wills, and
Irene Koolwijk

Introduction	123
Feeding relationship and feeding styles	124
Screening and Assessment Strategies	125
Authoritative	126
Authoritarian	127
Indulgent	127
Uninvolved	127
Feeding Approach	128
Online resources for support with caregiver–child feeding relationship	129
Selective intake based on oral–motor delay	129
Assessment Strategies	131
Online resources for feeding difficulties	133
Picky eating	133
Screening and assessment strategies	134
Feeding approach	135
Online resources for picky eating	135
Fear of feeding: medical trauma and feeding challenges	135
Screening and assessment strategies	137
Specific questions to ask caregivers	137
Further questions about general symptoms of posttraumatic stress beyond feeding	138
Feeding approach	138
Online resources for medical trauma related feeding challenges	139
Summary	140

Review of Narcolepsy and Other Common Sleep Disorders in Children

Sagarika Nallu, Giselle Y. Guerrero, Jaclyn Lewis-Croswell, and
Lara M. Wittine

Introduction	147
Narcolepsy	148
Diagnosis	149
Treatment	149
Sleep disordered breathing in children	150
Obstructive sleep apnea syndrome	151
Central sleep apnea	152
Circadian rhythm disorders	152
Parasomnias in children	154
Restless legs syndrome, periodic limb movements in sleep, and periodic limb movement disorder	155
Summary	157
Acknowledgments	157

Tall Stature in ChildrenAlexander K.C. Leung, Alexander A.C. Leung, and
Kam Lun Hon

Introduction	161
Measurements of growth	162
Causes and clinical manifestations	163
Familial tall stature	163
Constitutional tall stature	163
Exogenous obesity	164
Precocious puberty	164
Pituitary growth hormone excess	164
Sotos syndrome (cerebral gigantism)	164
Hyperthyroidism	165
Marfan syndrome	165
Homocystinuria	165
Klinefelter syndrome	166
XYY syndrome	166
Trisomy X (47, XXX females)	166
Fragile X syndrome	167
Hypogonadal syndromes	167
Familial glucocorticoid deficiency	167
Beckwith-Wiedemann syndrome	167
McCune-Albright syndrome	168
Weaver syndrome	168
Proteus syndrome	168
Congenital generalized lipodystrophy	168
Simpson-Golabi-Behmel syndrome	169
Clinical evaluation	169
Diagnostic studies	170
Complications	171
Management	171

Updates on Hypertension and New Guidelines

Pamela S. Singer

General content	177
Epidemiology	177
Diagnosis	178
Workup	181
Treatment	182
Medication	184
Summary	184

Cerebral Palsy: Diagnosis, Epidemiology, Genetics, and Clinical UpdateAbimbola Michael-Asalu, Genevieve Taylor, Heather Campbell,
Latashia-Lika Lelea, and Russell S. Kirby

Introduction	190
--------------	-----

Diagnosis of cerebral palsy	190
Neuroimaging	191
Neuromotor assessment	191
Differential diagnosis	192
Classification of cerebral palsy	193
Epidemiology of cerebral palsy	194
Risk factors	194
Prevention	197
Therapeutic hypothermia	197
Caffeine	198
Avoidance of early postnatal corticosteroids	198
Antenatal steroids	199
Magnesium	199
Pathogenesis	199
The genetics of cerebral palsy	200
Single-gene mutations	201
Candidate cerebral palsy genes	201
Copy number variants	201
Single nucleotide polymorphisms	202
Management of cerebral palsy	202
Addressing quality of life in patients with cerebral palsy	203
Summary	204

Pediatric Multiple Sclerosis: A Review

Megan M. Langille, Alice Rutatangwa, and Carla Francisco

Demographics	209
Other demyelinating conditions of childhood	210
Acute disseminated encephalomyelitis	210
Radiologically isolated syndrome	210
Neuromyelitis optica spectrum disorder	211
Myelin oligodendrocyte glycoprotein antibody	212
Diagnosis	213
Risk factors for the development of pediatric	215
Genetics	215
Environmental factors	215
MRI findings in pediatric-onset multiple sclerosis	216
Clinical course and prognosis	217
Treatment	219
Treatment models	223
Inadequate treatment response	223
Medications	223
Oral	223
Infusion	224
Clinical trials	225
Final thoughts	225

Resurgence of Syphilis

Joseph A. Puccio, Aileen Cannon, Kalyani Derasari, and
Rodney Friend

Introduction	231
History and epidemiology	232
Centers for Disease Control and Prevention (CDC) call to action	237
Summary	242

Nonoccupational Postexposure Prophylaxis and Preexposure Prophylaxis for Human Immunodeficiency Virus Prevention in Adolescents and Young Adults

Diane M. Straub and Tanya L. Kowalczyk Mullins

Introduction	245
Nonoccupational postexposure prophylaxis	246
Safety	247
Patient awareness of nonoccupational postexposure prophylaxis	248
Clinical implementation	249
Preexposure prophylaxis	252
Preexposure prophylaxis in adolescents	252
Safety	252
Patient uptake and attitudes	253
Clinician attitudes and behaviors	254
Clinical implementation	254
Legal issues for minor-aged adolescents	256
Summary	257

***Clostridium difficile* Infection in Children**

Ana M. Alvarez and Mobeen H. Rathore

Introduction	263
Pathogenesis	264
Risk factors	264
Epidemiology	265
Clinical presentation	267
Colonization	267
Disease	267
Diagnosis	268
Treatment and prevention	269
Infection prevention and control	275
Summary	276
