In the Excel file of the supplementary content “Top 10 Journals per Scientific Category”, the category “Materials Science Coating Films” only has 7 journals but the calculations in this file included 10. So, all the attributions from line 1114 downwards are displaced by 3 lines. That is, the three top journals from “Dermatology” are included in “Materials Science Coating Films”, then three journals from “Political Science” are in “Dermatology”, etc. The authors apologize for the mistake. A corrected supplementary file is displayed below. This correction does not, in any way, compromise the findings of the study, either in terms of the methodology, results, or interpretations drawn from the data therein.
