The article “Clinical significance of coryneform Gram-positive rods from blood identified by MALDI-TOF mass spectrometry and their susceptibility profiles – a retrospective chart review” had mistakenly referred to the Clinical and Laboratory Standards Institute’s M45-3rd edition document in the manuscript. The correct reference is:

Clinical and Laboratory Standards Institute Methods for antimicrobial dilution and disk susceptibility testing of infrequently isolated or fastidious bacteria (M45-A2). Clinical and Laboratory Standards Institute; 2010. p. 18.

DOI of original article: <https://doi.org/10.1016/j.diagmicrobio.2016.04.013>.
