The authors regret an error in Figure 1 of the published article which shows the amine and aryl group moved one carbon over on the cyclohexanone structure whereas they should be next to the ketone. A corrected Figure 1 can be found in the NIHMS manuscript, but was too

late for the journal publication. The authors thank Patrick Morris, PhD, Division of Preclinical Innovation, National Center for Advancing Translational Sciences, for informing us of the error, and we apologise for any inconvenience caused.
