This article has been retracted: please see Elsevier Policy on Article Withdrawal (<https://www.elsevier.com/about/our-business/policies/article-withdrawal>). This article is being retracted at the request of the authors due to a legal dispute regarding the eight-item Morisky Medication Adherence Scale (MMAS-8), which was adapted for use in the article.

It is important to note that the retraction of this article is not the result of any research misconduct on the part of the authors or that of the team. The retraction relates to the published version of the article that contains the MMAS-8 scale. The journal will publish a revised version that does not contain the tool or any references to it. The elimination of the scale does not alter the conclusions of the study.

Please find the revised version of the article here: <https://doi.org/10.1016/j.drugalcdep.2018.11.018>
