

Trends in Endocrinology & Metabolism

January 2019, Volume 30, Number 1, pp. 1–76

Spotlight

- 1 **Sensing Mitochondrial Acetyl-CoA to Tune Respiration** *Christine A. Mills, Alec G. Trub, and Matthew D. Hirschey*

Opinion

- 4 **Pancreatic Progenitors: There and Back Again** *Juan Domínguez-Bendala, Mirza Muhammad Fahd Qadir, and Ricardo Luis Pastori*

Reviews

- 12 **High-Density Lipoprotein Components and Functionality in Cancer: State-of-the-Art** *Shiva Ganjali, Biagio Ricciuti, Matteo Pirro, Alexandra E. Butler, Stephen L. Atkin, Maciej Banach, and Amirhossein Sahebkar*
- 25 **Crosstalk between Estrogen Signaling and Breast Cancer Metabolism** *Eylem Kulkoyluoglu-Cotul, Alexandra Arca, and Zeynep Madak-Erdogan*
- 39 **A Comparative Perspective on Extra-retinal Photoreception** *Jonathan H. Pérez, Elisabetta Tolla, Ian C. Dunn, Simone L. Meddle, and Tyler J. Stevenson*
- 54 **Sex, Microbes, and Polycystic Ovary Syndrome** *Varykina G. Thackray*
- 66 **Natural Estrogen Receptor Modulators and Their Heterologous Biosynthesis** *Jiali Yang, Lingrong Wen, Yueming Jiang, and Bao Yang*

On The Cover: Many non-mammalian vertebrate species, such as birds, not only possess photoreceptors in the retina for sight but other photoreceptors within the brain. These 'extra-retinal' photoreceptors have been linked with many physiological functions within these species. On pages 39–53 of this issue, Perez and colleagues discuss the form and function of extra-retinal photoreceptors in the brain and how these receptors regulate behavior and endocrine function. Cover image from istock.
