

Aims and Scope

The electronic Journal of Traditional and Complementary Medicine (eJTCM) is a quarterly open-access journal that covers the fields of traditional medicine, herbal medicine, and dietary therapy. The Journal provides a global platform for discussion, perspectives and research on traditional and Complementary medicine. eJTCM focuses on both Eastern and Western complementary medicine and welcomes articles from all medical perspectives.

Major topics covered include:

- Traditional and Herbal Medicine
- Preventive Medicine
- Dietary Therapy/Nutrition Supplements
- History, Philosophy and Social-Cultural Aspects of Traditional Medicine

All articles published in the Journal, including perspectives, review, original articles, and short communications are the original content of the authors. eJTCM considers the Quality Control and the procedures for the preparation and characterization of herbal medicines, as well as the authentication of dietary supplements, as basic requirements to guarantee efficacy, safety and reproducibility in Traditional and Complementary Medicine. eJTCM encourages submissions which present observation and experimental investigation in translational and clinical studies, animal experiments, and *in vivo/in vitro* studies. Particular emphasis is given to the pathophysiological basis and the cellular-molecular mechanisms that underlie the beneficial effects of Traditional and Complementary Medicine.
