

Gratitude to Clinical Imaging Reviewers, with a look forward to 2020

Elizabeth Kagan Arleo, MD

Editor-in-Chief

The Editorial Board and staff of *Clinical Imaging* wish to thank our reviewers for their time and effort in critically reading selected manuscripts and writing valuable feedback based on their subspecialty expertise. The journal's reviewers are critical to its success. The journal's success can be seen by its increasing impact factor, which has nearly doubled from 0.596 (2013) to 1.136 (2018), and by its increasing number of issues published annually, which will actually double in 2020 when the journal commences monthly publication for the first time ever.

To recognize the hard work of our reviewers, all who performed at least one review during the 2018-2019 academic year (July 2018-June 2019) are listed below. It is our hope that, in addition to the 3.0 *AMA PRA Category 1 Credits*TM reviewers can claim with the submission of each satisfactorily completed review, this in some way conveys our gratitude for the voluntary work our reviewers perform for the advancement of our journal, our specialty and ultimately our patients, as we strive to care for them through the best clinical imaging possible.
