

Expression of Concern

Expression of Concern

PAUL J. HAUPTMAN, MD
EDITOR IN CHIEF

In the December 2002 issue of the Journal of Cardiac Failure, we published a review paper entitled “Myocyte proliferation and ventricular remodeling” by Leri, Kajstura and Anversa [1]. Based on (1) recent evidence of data and image manipulation [2], (2) the citation of a paper of questionable merit in the 2002 paper and (3) the inclusion of several previously unpublished images of uncertain accuracy in the same paper, we are publishing this Expression of Concern that materials presented in the 2002 paper may not be reliable.
