

## Acknowledgement to our reviewers

Good and timely peer review is absolutely essential for the success of the *Journal of Hepatology*. We are therefore extremely grateful for the support of so many colleagues who have dedicated their time this year. These reviewers have evaluated the research that was submitted to the journal, and shared their insights about the papers strengths and weaknesses. This has both enabled us to make the right editorial decisions, and helped our authors to further improve their work. Out of necessity, the role of the reviewer is anonymous and therefore, may go unnoticed at times. At the end of this year, one in which we saw the Journal's Impact Factor reach 15.04, we would like to take an opportunity to openly acknowledge all those reviewers who have contributed to the Journal's success. Notably, 70% of reviewer invitations were accepted and the average review time was 14 days. Below you will find a list of those who completed one or more reviews between October 1st, 2017 and September 30th, 2018. We would like to warmly thank them for their hard work and dedication and would like to extend a special thanks to those who completed their reviews on time.
