

Corrigendum to “EASL Clinical Practice Guidelines: Management of hepatocellular carcinoma” [J Hepatol 69 (2018) 182–236][☆]

European Association for the Study of the Liver^{**}

It has come to our attention that there is an error in the legend to Table 3 of the ‘EASL Clinical Practice Guidelines: Management of hepatocellular carcinoma’. The passage of text referring to the contribution of platelet count to the PAGE-B score has been incorrectly written as follows: ‘platelet count ($\geq 200,000/\mu\text{l} = 0$, $100,000-199,999/\mu\text{l} = 1$, $<100,000/\mu\text{l} = 2$)’.

This passage of text should read as follows: ‘platelet count ($\geq 200,000/\mu\text{l} = 0$, $100,000-199,999/\mu\text{l} = 6$, $<100,000/\mu\text{l} = 9$)’.

We apologise for this mistake and any inconvenience caused.
