After publication of the article “Use of Essential Oils Following Traumatic Burn Injury: A Case Study” (May–June 2017), coauthors Heather Sanders and Kathleen Jopke disclosed to the journal that they are sales representatives of an essential oil company. The editor in chief determined that this disclosure does not alter the conclusion of the case

study, which the authors' institutional review board determined to not be human research and which underwent peer review. All authors have approved this corrigendum and apologize for any inconvenience caused.
