The authors regret Table 1 in the article “Parents' experiences of Family Centred Care practices” (September/October 2018, volume 42, page 40) had some errors. The heading of column Section A should read, “How important is it for nurses to do this?” Also, we are reprinting the correct version of the tool itself herein. Finally, the complete citation for the tool is Curley, M.A.Q., Hunsberger, M.; Harris, S.K. (2013). Psychometric Evaluation of the Family-Centered Care Scale for Pediatric Acute Care Nursing. *Nursing Research*, 62(3):160–168.
