CONTENTS

■ Editorial Opinion

- It Is Time 879
Vallire D. Hooper

■ Continuing Education

- Identification and Management of Ischemic Stroke in the Postanesthesia
Care Unit 881
Lisa O'Driscoll, Chad Moore, and Raymond Bonds

This continuing education article presents a case study of an ischemic stroke presentation in the postanesthesia care unit setting. Symptom recognition and immediate management priorities are highlighted.

■ Original Articles

- Improving Communication Between Health Care Providers,
Families, and Children with Autism Spectrum Disorder:
The Linked Program 889
Lisa A. Clark, Susan Whitt, and Kelly Lyons

An overview of an evidence-based program designed to better meet the needs of patients with autism spectrum disorder and their families while improving patient safety and staff satisfaction is presented.

- The Effects of Anesthesia on the Pediatric Developing Brain: Strategies
to Reduce Anesthesia Use in Pediatric MRI and Nursing's Role in Driving
Patient Safety 900
*Kari A. Mastro, Linda Flynn, Christa Preuster, Lisa Summers-Gibson, and
Mark H. Stein*

This integrative literature review describes the physiological and biological effects of anesthesia on the pediatric developing brain.

- Implementation of Vulnerable Elders Survey-13 Frailty Tool to Identify
At-Risk Geriatric Surgical Patients 911
*Tedrick L. Vernon III, Andi N. Rice, J. Frank Titch, Brandyce F. Hill, and
Virginia C. Muckler*

The feasibility of using the Vulnerable Elders Survey as a preoperative assessment tool to help guide perioperative decision making for the geriatric population is described in this study.

EDITORS 1986-1988

Anne Allen, RN

-
- Effect of Listening to Music on Postoperative Cognitive Function in Older Adults After Hip or Knee Surgery: A Randomized Controlled Trial 919
Funda Çetinkaya

This study evaluates the effect of listening to music on postoperative cognitive dysfunction in geriatric surgical patients.

- Reducing Preventable Surgical Cancellations: Improving the Preoperative Anesthesia Interview Process 929
Kirsten A. Leite, Todd Hobgood, Brandy Hill, and Virginia C. Muckler

The implementation and impact of a standardized preoperative interview guideline on preoperative record completion, unnecessary laboratory testing, and surgical cancellations is described in this best practice article.

- Evaluation of a Presurgical Pregnancy Testing Protocol at an Ambulatory Surgery Center 938
Jamese C. Lamb, Deborah Allen, Jennifer Franklin, and Victoria Goode

This article describes compliance, costs, time, and barriers to implementing a presurgical pregnancy testing protocol.

- Nurse Anesthetists' Communication in Brief Preoperative Meeting With Orthopaedic Patients—An Interview Study 946
Ferid Krupic

Nurse anesthetists' communication with orthopedic patients is explored in this qualitative, group interview study.

- Key Factors for Successful General Anesthesia of Obese Adult Patients 956
Fanny Larson, Ingela Nyström, Silje Gustafsson, and Åsa Engström

This qualitative observational study explores the key factors for successful airway management in the adult obese patient.

- Peripheral Nerve Blocks and Immediate Postoperative Recovery: A Single-Institution Survey of Perianesthesia Nurses' Preferences and Opinions 965
Robert L. McClain, Steven B. Porter, Courtney L. Scott, Laura S. Mazer, and Christopher B. Robards

Perianesthesia nursing preferences with regards to the impact of peripheral nerve blocks on patient recovery are explored in this survey study.

- Association of End-Tidal Carbon Dioxide Monitoring With Nurses' Confidence in Patient Readiness for Postanesthesia Discharge 971
Antoinette Zito, Amy Berardinelli, Robert Butler, Shannon L. Morrison, and Nancy M. Albert

Nurses' perceived confidence in the use of end-tidal carbon dioxide monitoring as an assessment of patient discharge readiness is explored in this article.

- Adverse Events in Anesthesia: An Integrative Review 978
Cassiane de Santana Lemos and Vanessa de Brito Poveda

This integrative literature review explores the current science related to anesthesia associated adverse events in the perioperative setting.

Preventing Inadvertent Hypothermia in Patients Undergoing Major Spinal Surgery: A Nonrandomized Controlled Study of Two Different Methods of Preoperative and Intraoperative Warming **999**
Mia N. Granum, Karin Kaasby, Søren T. Skou, and Mette Grønkjær

The effect of two methods of preoperative and intraoperative warming on the incidence of inadvertent hypothermia is explored in this nonrandomized clinical trial.

Thermal Suit or Forced Air Warming in Prevention of Perioperative Hypothermia: A Randomized Controlled Trial **1006**
Irene Brodshaug, Bente Tettum, and Johan Raeder

This prospective randomized controlled trial compares the effect of two intraoperative warming methods on the incidence of perioperative hypothermia in the orthopedic spinal surgery patient.

Evaluation of Warming Effectiveness on Physiological Indices of Patients Undergoing Laparoscopic Cholecystectomy Surgery: A Randomized Controlled Clinical Trial **1016**
Fereshteh Baradaranfard, Mitra Jabalameli, Ahmad Gbadami, and Akram Aarabi

This three-group randomized controlled trial compared forced air, warmed intravenous fluids, and standard care on physiological indices in the laparoscopic cholecystectomy patient.

Educating Patients About Opioid Disposal: A Key Role for Perianesthesia Nurses **1025**
Katreena C. Merrill, Valynn Christina Haslam, Karlen E. (Beth) Luthy, and Craig Nuttall

Opioid prescription practices, patient use of opioids, and patient knowledge about opioid disposal are explored in this mixed methods survey.

Perceived Discomfort, Pain and Nonpain Symptoms in a Postanesthesia Care Unit: An Observational Study **1032**
Chong Tian, Yao Yu, Jing Mao, and Patricia M. Davidson

This study explores patient-perceived discomfort in the postanesthesia care unit and factors contributing to these symptoms and their related characteristics.

Decreasing the Incidence of Postoperative Urinary Retention and Incontinence With Total Joint Replacement Patients After Spinal Anesthesia in the Postanesthesia Care Unit: A Quality Improvement Project **1040**
Shannon M. Wisbart

The effect of standardized bladder scanning guidelines on the incidence of postoperative urinary retention is explored in this quality improvement project.

Essential Oils to Reduce Postoperative Nausea and Vomiting **1047**
Maxine A. Fearrington, Brandon W. Qualls, and Mary G. Carey

The effect of the use of essential oil products on the incidence of postoperative nausea and vomiting is explored in this double-blinded study.

Adult Perianesthesia Do Not Resuscitate Orders: A Systematic Review **1054**
Joshua Hardin and Barbara Forshier

This systematic review synthesizes current practice patterns with regards to the management of do not resuscitate orders in the perianesthesia setting.
