 - graduate failure on ABS examinations in civilian, programs, surgery program director turnover correlates with, e24-e29
 - neurosurgery, palliative care and communication training in, 1691-1702
 - obstetrics-gynecology, interview methods in a single institution, analysis of, 414-419
 - orthopedic, application components correlate with final rank list order matching into an, 585-590
 - recruitment, ERAS and NRMP and their roles in, 1163-1166
 - training in obstetrics and gynecology, fellow perceptions of, 93-98
 - urology, training and perceive resident abilities in United States, evaluation of, 936-948
- Residency Review Committees (RCC), and ACGME standards, impact of regulation on resident international experiences on, 1588-1593
- Resident
- attending relationship in the improvement of intraoperative educational experience, role of confidence in, 1187-1199
 - performed cataract surgeries, comprehensive surgical curriculum reduced intra-operative complication rates of, 150-157
 - to-resident research mentorship, mentoring sideways a model of, 1-3
 - communication skills training for general surgery, 1223-1230
 - cross-sectional study of emotional intelligence in military general surgery, 664-673
 - curriculum and required participation in TWIS on general surgery ABSITE performance and well-being, impact of comprehensive, e110-e117
 - education
 - and engagement in quality improvement enhances documentation, shortens hospital length of stay and creates culture of continuous improvement, 771-778
 - minimally invasive general surgery, robotic curriculum enhances, 548-553
 - as effectors in improving opioid prescribing behavior, e159-e164
 - and faculty perceptions, video-based analysis of, 906-915
 - feedback, value and barriers to use of SIMPL tool for, 620-627
 - general and pediatric surgical, trends in routine and complex hepatobiliary surgery among, 1005-1014
 - general surgery
 - educational targets to reduce medication errors by, 1612-1621
 - exposure to complex oncology-relevant cases, national trends in, 378-386
 - and general surgeons, impostor phenomenon and burnout in, 99-106
 - impact of surgical training rotation on plastic surgery skills and competencies development of, 1579-1587
 - and obstetrics and gynecology, simulation-based communication training for, 856-863
 - global health electives in Obstetrics and Gynecology, promoting health equity of, 1594-1604
 - instituting a postoperative feedback process for orthopedic surgery, 1200-1204
 - international experiences on ACGME and RRC standards, impact of regulation on, 1588-1593
 - involvement in uncommon operations, understanding the clinical implications of, 1319-1328
 - mixed methods approach to assess knowledge and raise awareness amongst, 305-314
 - in operating room, thematic analysis of questions posed by, 315-320
 - operative autonomy
 - role of manual dexterity and cognitive functioning in enhancing, e74-e84
 - video-based cadaver curriculum demonstrate proficiency enhance, e144-e152
 - ophthalmology, to self-assess their performance through established milestones, ability of, 1076-1087
 - orthopedic surgery
 - across North America, mental health status among, 1484-1491
 - adult case logs, national trends in, 893-897
 - development of spine surgical skills and written assessment for, 1094-1100
 - for participation in patient safety activities, multidisciplinary simulation activity effectively prepares, e224-e229
 - perceive, abilities in United States, evaluation of urology residency training and, 936-948
 - perspectives on teaching during awake surgical procedures, 1492-1499
 - postprocedural, coaching, utilizing intraprocedural interactive video capture with Google Glass for, 607-619
 - pre-education enhances the success of manual training for orthopedic surgery, 1433-1439
 - for predetermined factors identified and thought to be important for work performance and satisfaction, selecting, 949-961
 - prevalence of screening for PTSD among, e30-e40
 - quantitative analysis of surgical residency reform using case-logs to evaluate experience of, 25-35
 - safety level of total central venous access port implantation performed by, 182-192
 - simple and low-cost drilling simulator for training plunging distance among orthopedic surgery, 281-285
 - surgeon stress, effects on operative times to case difficulty, postgraduate year and, 354-361
 - surgery, plastic, establishing validity evidence for operative performance rating system for, 529-539
- surgical
- ability to deliver bad news, emotional intelligence impacts, 779-784
 - China, adaptation of Communication Skills Attitude Scale (CSAS) to, 329-336
 - effectiveness of In-Service Education Program to improve patient safety directed at, 1309-1318
 - emotional intelligence and burnout, evaluation and exploring variations in, 628-636
 - implementation and evaluation of intraoperative timeout prior to stapler use by, 1622-1628

interpretation skills differ from other trainees, 1500-1505
 junior, trauma technical skills and management exposure for, 824-831
 relationship between self-efficacy and well-being among, 321-328
 verification of proficiency in surgical skills for postgraduate year 1, e209-e216
 volume for closed wrist and forearm fracture treatment in orthopedic surgery, minimum case requirement improvement, 1153-1160
 well-being and attrition, social belonging as predictor of, 370-377
 through interactions with medicolegal system, supporting, 601-603
 training and performance evaluation, incorporating a detailed case log system to standardized robotic colon and rectal surgery, 1022-1029
 Resident-as-Teacher Programs, in general surgery residency, 1205-1210
 Resilience, -associated traits, in medical students, hemorrhage control training promotes, 77-82
 Resuscitation, multidisciplinary simulation-based team training for trauma, 1669-1680
 Risk assessment, for medical student curriculum in prediction of postoperative surgical risk, 89-92
 Robotics
 colon and rectal surgery resident training and performance evaluation, incorporating a detailed case log system to standardized, 1022-1029
 curriculum enhances minimally invasive general surgery residents education, 548-553
 Senhance surgical, objective assessment of early stages of learning curve for, 201-214
 surgical simulation and simulated traditional laparoscopy, surgical skills between, 1469-1475
 training procedure, standard basic skills, benefit of using integrated video recording system compared to, 362-369
 urological surgery, understanding and assessing nontechnical skills in, 193-200
 RRC *See* Residency Review Committees (RCC)

S

Safety, level of total central venous access port implantation performed by residents, 182-192
 SCORE *See* Surgical Council on Resident Education (SCORE)
 Senhance, surgical robotic system, objective assessment of early stages of learning curve for, 201-214
 Shoulder, and knee examination, comparative effectiveness of teaching methods for, 1440-1449
 SIMPL tool *See* System for improving and measuring procedural learning (SIMPL) tool
 Simulation
 -based communication training for general surgery and obstetrics and gynecology residents, 856-863
 -based team training for trauma resuscitation, 1669-1680
 ACS ASE medical student, -based skills curriculum implementation, 962-969
 activity effectively prepares residents for participation in patient safety activities, e224-e229
 arthroscopy, on triangulation and probing skills, effectiveness of, 1131-1138
 endovascular, on surgeon stress and technical performance. evaluation of impact of, 864-871
 interprofessional, to inform perioperative facility planning and design, 223-233
 longitudinal, curriculum for trauma team training, data driven competitive motivation strategies in, 1122-1130
 machine learning to assess surgical expertise in virtual reality, 1681-1690
 nontechnical skills and assessment, success and evolution of urology training for registrars incorporating, 1425-1432
 robotic surgical, and traditional laparoscopy, surgical skills between, 1469-1475

surgery tutor for computational assessment of technical proficiency in soft-tissue tumor resection in, 872-880
 surgical
 for capacity building, facial plastic and reconstructive surgery training module using, 274-280
 markers of proficiency, 234-241
 team, to improve teamwork and communication, 1413-1424
 training
 improves trauma team efficiency, 1116-1121
 for laparoscopy, haptic feedback, force feedback, and force-sensing in, 242-261
 at USBC course, method to evaluate trainee progression during, 215-222
 Simulator
 simple and low-cost drilling, for training plunging distance among orthopedic surgery residents, 281-285
 virtual reality, for training transurethral resection of bladder tumors, validation of, 568-577
 Skills
 acquisition process using item response theory, identifying the essential portions of, 1101-1106
 applying, taught, determining how often participants acquired the equipment necessary in, 446-452
 arthroscopic, using ASSET evaluation, validation of assessing, 1640-1644
 communication, training for general surgery residents, 1223-1230
 differ from other trainees, surgical residents interpretation, 1500-1505
 effectiveness of arthroscopic simulation training on triangulation and probing, 1131-1138
 learning, procedural, influencing mindsets and motivation in, 652-663
 low-cost endoscopic, model for Fundamentals of Endoscopic Surgery training, 1456-1459
 nontechnical
 in robotic urological surgery, understanding and assessing, 193-200
 simulation and assessment, success and evolution of urology training for registrars incorporating, 1425-1432
 in surgery in systematic review of current training modalities, 14-24
 in surgical trainees, use of novel measure of, 519-528
 survey on trainees on educational value of surgical multidisciplinary team meetings for learning, 1034-1047
 pretraining, preparation for new interns, initial experience with, e217-e223
 standard basic, robotic training procedure, benefit of using integrated video recording system compared to, 362-369
 trauma surgery technical, training courses, efficacy of, 832-843
 trauma technical, and management exposure for junior surgical residents, 824-831
 Soft-tissue tumor, resection in simulation, surgery tutor for computational assessment of technical proficiency in, 872-880
 Sports medicine, analysis using OITE, 286-293
 Structured review instrument, improves quality of orthopaedic journal club, 294-300
 Surgeons
 communication and family understanding of patient prognosis in critical ill surgical patients, e85-e99
 consultant, trainer performance with respect to workplace based assessment completion, evaluation of, 1068-1075
 exploring the training gap for isolated military, 1139-1145
 familiarizing, with malpractice litigation, innovative approach for, 127-133
 general, and general surgery residents, impostor phenomenon and burnout in, 99-106
 global, developing the future of generation of, 1030-1033
 with high-stakes communication, using implementation science to adapt a training program to assist, 165-173
 inter-rater reliability of technical skills assessment and retention of rate training among attending, 1088-1093

- led clinically focused anatomy course increases student selection of general surgery as career, 694-699
- model for maintaining medical readiness, civilian-military trauma partnerships and visiting, 738-744
- nonprimary, analysis of contemporary operative experience as, e100-e109
- residents stress, effects on operative times to case difficulty, postgraduate year and, 354-361
- stress and technical performance, evaluation of impact of high-fidelity endovascular simulation on, 864-871
- and surgical trainees underestimate the total charges and reimbursements associated with commonly performed general surgery procedures, 802-807
- in their first year of independent practice, JSPAT for, e191-e200
- using a wearable single-channel electroencephalographic device, detecting mental workload in, 1107-1115
- Surgery**
- automated methods of technical skill assessment in, 1629-1639
- awake, resident perspectives on teaching during, 1492-1499
- clerkship
- impact of medical student burnout on performance of, 1241-1247
 - impact on student examination scores, evaluations and perceptions on team-based learning in, 408-413
 - perceived barriers to development of technical skill proficiency in, 1267-1277
- critical ill, patients, surgeon communication and family understanding of patient prognosis in, e85-e99
- curriculum in nominal group technique, defining the content for a quality and safety in, 795-801
- department, designing a comprehensive professional development program in, 727-737
- discharge efficiency, hospital teaching status impacts, 1329-1336
- effects and consequences of being an OSCE examiner in, 433-439
- evolution of workforce diversity in, 1015-1021
- influence of instructional approach on acquiring clinical skills in, 140-149
- knot tying, fine, assessment of, 808-813
- medical student
- interest group and its influence on mentorship and career exploration, 604-606
 - journal club, efficacy of, 83-88
- morbidity and mortality conference, lessons learned from, 174-181
- number of operative performance ratings needed to reliably assess the difficulty of, e181-e184
- performance, training effects of visual stroboscopic impairment on, 560-567
- program director turnover correlates with residency graduate failure on ABS examinations in civilian residency programs, e24-e29
- residents interpretation skills differ from other trainees, 1500-1505
- rural, track and review of, training programs, creating a, 459-468
- Senhance robotic system, objective assessment of early stages of learning curve for, 201-214
- simulation, markers of proficiency, 234-241
- subspecialties and its influence on student perceptions of surgical career, early exposure to, 1248-1257
- in systematic review of current training modalities, nontechnical skills in, 14-24
- transplant, fellowship applicants, gendered differences in letters of recommendation for, 427-432
- tutor for computational assessment of technical proficiency in soft-tissue tumor resection in simulation, 872-880
- undergraduate and postgraduate, objective assessment of entrustable professional activity handover in, 1258-1266
- Surgical Council on Resident Education (SCORE), portal usage for surgical training programs, e138-e143**
- Surgical education**
- building a framework for self-regulated learning in, e64-e73
 - integrating social outreach into, 756-761
 - research trends in North America, 1476-1483
 - survey research through the APDS listserv, tracking, e41-e48
 - use of escape rooms as an alternative teaching strategy in, 134-139
- Surgical educators, qualities and methods of highly effective, 1293-1302**
- Surgical journals, exclusively open-access, correlation between cost of publication and journal impact in, 107_119**
- Surgical performance, virtual reality, influenced by force feedback device, 262-273**
- Surgical residency**
- colorectal, curriculum most valued by recent graduates, identify aspects of, 720-726
 - comprehensive review of how journal club utilized in, 637-643
 - general
 - applicants, a linguistic comparison of impact of gender on, 899-905
 - Resident-as-Teacher Programs in, 1205-1210
 - reform, using case-logs to evaluate resident experience, quantitative analysis of, 25-35
 - robotic colon and rectal, and performance evaluation, incorporating a detailed case log system to standardized, 1022-1029
 - student factors that influence clerkship grades and matching into, 393-400
 - training positions, value of dedicated research time for IMGs in obtaining, 43-49
- Surgical residents**
- ability to deliver bad news, emotional intelligence impacts, 779-784
 - in China, adaptation of Communication Skills Attitude Scale (CSAS) to, 329-336
 - during difficult patient family conversations, communication deficits among, 158-164
 - effectiveness of In-Service Education Program to improve patient safety directed at, 1309-1318
 - emotional intelligence and burnout, evaluation and exploring variations in, 628-636
 - implementation and evaluation of intraoperative timeout prior to stapler use by, 1622-1628
 - junior, trauma technical skills and management exposure for, 824-831
 - plastic, establishing validity evidence for operative performance rating system for, 529-539
 - relationship between self-efficacy and well-being among, 321-328
 - rotation on physician practices following residency, effect of global, 480-486
 - training, for ultrasound-guided assessment and management of unstable patients, 540-547
 - well-being and attrition, social belonging as predictor of, 370-377
- Surgical risk, postoperative, needs assessment for medical student curriculum in prediction of, 89-92**
- Surgical skills**
- laparoscopic urology, course on the successful implementation of surgical services, impact of, 591-599
 - open, curriculum via self-paced *versus* group video tutorial viewing, evaluation of introduction to, 453-458
 - orthopedic, competency, obstacles affecting the implementation of O-SCORE for assessment of, 881-892
 - plastic, and competencies development of general surgery residents in Rwanda, impact of surgical training rotation on, 1579-1587
 - for postgraduate year 1 surgical residents, verification of proficiency in, e209-e216
 - between robotic surgical simulation and simulated traditional laparoscopy, 1469-1475
 - in search of characterizing, 1348-1363
 - in virtual reality tasks for novices, role of active engagement of peer observation in acquisition of, 1655-1662
 - and written assessment for orthopedic surgery residents, development of spine, 1094-1100

Surgical training

- academic, programs to meet ACGME core competency milestones, alternative approach for, 785-794
 - among attending surgeons, inter-rater reliability of technical skills assessment and retention of rate, 1088-1093
 - assessing burnout in, e56-e63
 - compassion fatigue in, 1211-1222
 - crowdsourced assessment and inanimate biotissue drills to evaluate in, 814-823
 - facial reconstructive, module in Haiti, using mobile text and media complement teaching in, 762-770
 - factors affecting the development of confidence among, 674-683
 - gap for isolated military surgeons, exploring the, 1139-1145
 - gender bias experiences in, e1-e14
 - identification of warning signs during selection for, 684-693
 - in laparoscopic surgery for complex ileocolonic Crohn disease, 1364-1369
 - in management on acute appendicitis, current trends in, 506-511
 - orthopedic, orthopedic trauma case experience by orthopedic trainees on, 1556-1561
 - partnerships, global health in equity in, 9-13
 - programs, investigating gender differences in faculty evaluations by trainees in, e138-e143
 - provision burden, reducing, 337-342
 - relationship between stress, coping and psychological resilience and effects on performance and learning in, 343-353
 - rotation on plastic surgery skills and competencies development of general surgery residents in Rwanda, impact of, 1579-1587
 - scoping review explores video-based assessment in, 1645-1654
 - transurethral resection of bladder tumors, validation of high-end virtual reality simulator for, 568-577
 - trauma, technical skills, efficacy of, 832-843
 - use of novel measure of nontechnical skills in, 519-528
- System for improving and measuring procedural learning (SIMPL) tool, for resident feedback, value and barriers to use of, 620-627

T

Teaching

- during awake surgical procedures, resident perspectives on, 1492-1499
- hospital, status impacts surgical discharge efficiency, 1329-1336
- methods for knee and shoulder examination, comparative effectiveness of, 1440-1449
- strategy, in surgical education, use of escape rooms as an alternative, 134-139
- surgical, portable video media *versus* standard communication in, 440-445

Training

- and career, expectations of hepatopancreatobiliary fellows on, 1546-1555
- communication skills, for general surgery residents, 1223-1230
- curriculum for open ultrasound-guided liver tumor microwave ablation, evaluation of low-cost model and, 554-559
- data driven competitive motivation strategies in longitudinal simulation curriculum for trauma team, 1122-1130
- education improves musculoskeletal radiology interpretation in, 1605-1611
- effects of visual stroboscopic impairment on surgical performance, 560-567
- general surgery specialty, in UK, time out of, 55-64
- hemorrhage control, promotes resilience-associated traits in medical students, 77-82
- identifying and addressing high priority issues in general surgery education and, 50-54
- manual, for orthopedic surgery residents, pre-education enhances the success of, 1433-1439
- modality, nontechnical skills in surgery in systematic review of current, 14-24
- module, of facial plastic and reconstructive surgery, using surgical simulation for capacity building, 274-280
- multidisciplinary simulation-based team, for trauma resuscitation, 1669-1680

- palliative care and communication, in neurosurgery residency, 1691-1702
 - plunging distance among orthopedic surgery residents, simple and low-cost drilling simulator for, 281-285
 - program to assist surgeons with high-stakes communication, using implementation science to adapt, 165-173
 - residency, in obstetrics and gynecology, fellow perceptions of, 93-98
 - rural surgery, creating a rural surgery track and review of, 459-468
 - simulation
 - for laparoscopy, haptic feedback, force feedback, and force-sensing in, 242-261
 - at USBC course, method to evaluate trainee progression during, 215-222
 - surgical residents for ultrasound-guided assessment and management of unstable patients, 540-547
 - team, for emergency room trauma transfers, 1402-1412
 - urology, for registrars incorporating simulation, nontechnical skills and assessment, success and evolution of, 1425-1432
 - value of dedicated research time for IMGs in obtaining surgical residency positions in, 43-49
- Transurethral resection, training, of bladder tumors, validation of high-end virtual reality simulator for, 568-577

Trauma

- civilian-military, partnerships and visiting surgeon model for maintaining medical readiness, 738-744
- orthopedic, case experience by orthopedic trainees on orthopedic surgery training, 1556-1561
- and orthopedic surgery curriculum concordance, operative learning curve trajectory perspective in, 1569-1578
- program, uncovering cultural barriers to quality improvement learning in, 497-505
- resuscitation, multidisciplinary simulation-based team training for, 1669-1680
- surgery technical skills training courses, efficacy of, 832-843
- team efficiency, multidisciplinary simulation training improves, 1116-1121
- team leader, preferred attributes of, as evidence from a discrete choice experiment, 120-126
- team training, data driven competitive motivation strategies in longitudinal simulation curriculum for, 1122-1130
- technical skills and management exposure for junior surgical residents, 824-831
- transfers, team training for emergency room, 1402-1412

U

Ultrasound

- guided assessment and management of unstable patients, training surgical residents for, 540-547
- open, -guided liver tumor microwave ablation, evaluation of low-cost model and training curriculum for, 554-559

Urological surgery, robotic, understanding and assessing nontechnical skills in, 193-200

Urology

- residency training and perceive resident abilities in United States, evaluation of, 936-948
 - training for registrars incorporating simulation, nontechnical skills and assessment, success and evolution of, 1425-1432
- Urology Simulation Boot Camp (USBC), method to evaluate trainee progression during simulation training at, 215-222
- USBC. *See* Urology Simulation Boot Camp (USBC)

V

Vascular surgery, trainees, a binational need assessment to define the level of endovascular expertise required by, 982-989

Video

- based, cadaver curriculum demonstrate proficiency enhance resident operative autonomy, e144-e152
- based analysis of faculty and resident perceptions, 906-915
- based assessment in surgical training, scoping review explores, 1645-1654
- educational and research, library in minimally invasive surgery, methodology for developing, 745-755
- intraoperative point of view, capture and surgical segmentation in carpal tunnel release, 1663-1668
- media, portable *versus* standard communication in surgical teaching, 440-445
- on medical student medical decision making during inpatient rounding experience, impact of four components of instructional design, 1286-1292

Virtual reality

- simulation, machine learning to assess surgical expertise in, 1681-1690
- simulator for training transurethral resection of bladder tumors, validation of, 568-577
- surgical performance influenced by force feedback device, 262-273
- tasks for novices, role of active engagement of peer observation in acquisition of surgical skills in, 1655-1662

W

- Work performance, and satisfaction, selecting residents for predetermined factors identified and thought to be important for, 949-961
