

Letter from the Guest Editor

In this issue, the readers will get an opportunity to learn from experts on recent updates to the diagnosis of diffuse parenchymal lung diseases in general and IPF in particular. New classification of HRCT categories for the diagnosis of UIP and the rationale behind the inclusion of new categories is described in this edition.

I am grateful for the opportunity to serve as guest editor for this issue and would like to thank Dr. Janette

Collins for this opportunity. I would also like to thank all the authors for making this special edition possible.

Sudhakar Pipavath, MD
