The authors regret that, in Table 1 of the above-referenced article, the following text contained an error.

Low-carbohydrate diet: <130 g/d or <26% total energy

- The ADA definition of 130 g/d as its recommended minimum.

We cited the American Diabetes Association guideline for grams of carbohydrate as the recommended *minimum*, whereas the term “maximum” was intended.

The authors would like to apologise for any inconvenience caused.
