Correction to: Obesity Surgery

<https://doi.org/10.1007/s11695-019-03750-6>

In the original article, there are some incorrect data in the “Results” section of the Abstract. The corrected “Results” section is as follows:

Results: In total, 10 (14%) patients in the WLS Forte® group versus 23 (30%) patients in the sMVS group developed a deficiency. The costs for the WLS Forte® supplement were €30 versus €21 for sMVS. Additional return visits and associated costs for medical staff were the largest costs, up to 34% in the sMVS group. Total costs for supplementation with sMVS were €306 versus €216 for WLS Forte®.
