Correction to: Oral and Maxillofacial Surgery

<https://doi.org/10.1007/s10006-019-00755-4>

In page 8, column 2, lines 9-10: the words "males" and "females" are written in reverse order.

The correct text should be:

Compared to females, Iranian males had taller upper lips, taller lower thirds compared to middle thirds, taller chins (lips closer to the nose), taller faces (longer distances between lips and both the chin and subnasale), deeper superior and inferior sulci, more retruded lower lips and chins, thicker upper lips, and thicker chins.
