Orthopaedics & Traumatology: Surgery & Research (OTSR), and its French version *Revue de Chirurgie Orthopédique et Traumatologique (RCOT)* publish *Original articles* on clinical or basic science research topics relevant to orthopaedics, *Case reports* relating to rare and illustrative observations, *Technical notes* presenting innovations in the use of exploration or evaluation materials, *Review articles*, and *Letters to the Editor* from readers on articles published in this journal. Articles are chosen for publication based on critical analysis by at least two expert reviewers and reported by an editor assigned to the submission.

Official Publication of the Société Française de Chirurgie Orthopédique et Traumatologique (French Society for Orthopaedic Surgery and Traumatology), the journal publishes one special issue each year to report research from the Société Française d'Arthroscopie (French Arthroscopy Society). One supplement to issue 1 is devoted to the SoFCOT instructional lectures. Basic science articles are published in the journal's English version (OTSR). The editorial board asserts the total independence of its choices and decisions with respect, among others, to the publisher, industry and more generally the commercial activities of the publication.

The journal agrees to use the "Uniform requirements for manuscripts submitted to biomedical journals" (www.icmje.org). It also adheres to the rules of the Committee on Publication Ethics (COPE) and the recommendations of the French Health Authority (Haute Autorité de la Santé: HAS).

This journal and the individual contributions contained in it are protected under copyright, and the following terms and conditions apply to their use in addition to the terms of any Creative Commons or other user license that has been applied by the publisher to an individual article:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission is not required for photocopying of articles published under the CC BY license nor for photocopying for non-commercial purposes in accordance with any other user license applied by the publisher. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

Derivative Works

Users may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions or companies. Other than for articles published under the CC BY license, permission of the publisher is required for resale or distribution outside the subscribing institution or company. For any subscribed articles or articles published under a CC BY-NC-ND license, permission of the publisher is required for all other derivative works, including compilations and translations.

Storage or Usage

Except as outlined above or as set out in the relevant user license, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

Author rights

Author(s) may have additional rights in their articles as set out in their agreement with the publisher (more information at <http://www.elsevier.com/authorsrights>).

Notice

No responsibility is assumed by the publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, in particular, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.
