

Table of Contents

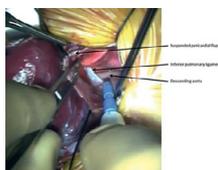

- 1 Introduction**
Luca A. Vricella

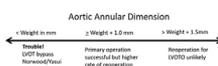

- 2 Cardiopulmonary Bypass in Premature and Low Birth Weight Neonates – Implications for Postoperative Care From a Neonatologist/Intensivist Perspective**
Ganga Krishnamurthy

- 10 Aortic Coarctation/Arch Hypoplasia Repair: How Small Is Too Small**
Victor Tsang, Henri Haapanen, and Ralph Neijenhuis

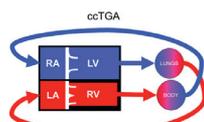

- 14 Supplemental Perfusion Techniques for Aortic Arch Reconstruction, With Emphasis on Direct Cannulation of the Descending Aorta**
James M. Hammel

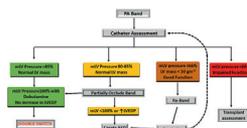

- 21 How Small Is Too Small? Decision-Making and Management of the Small Aortic Root in the Setting of Interrupted Aortic Arch**
Kyle W. Riggs and James S. Tweddell

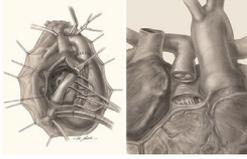

- 27 Pulmonary Atresia With Intact Ventricular Septum With Borderline Tricuspid Valve: How Small Is Too Small**
Damien J. LaPar and Emile Bacha

- 32 Congenitally Corrected Transposition of the Great Arteries: Anatomic, Physiologic Repair, and Palliation**
Zachary Spigel, Ziyad M. Binsalamah, and Christopher Caldarone

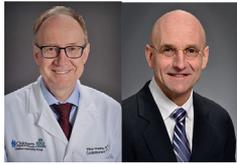

- 43 Left Ventricular Re-training: Feasibility and Effectiveness—What Are the Limits?**
David J. Barron and Kajan Mahendran

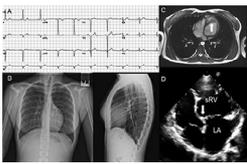

51 Corrected Transposition: Anatomic Repair Using the Hemi-Mustard Atrial Baffle and Bidirectional Superior Cavopulmonary Connection

Michael Ma, Richard D. Mainwaring, and Frank L. Hanley

57 Anatomic Repair of Corrected Transposition of the Great Arteries: The Double Switch

Viktor Hraska and Ronald K. Woods

61 Management of the Adult Patient With Congenitally Corrected Transposition: Challenges and Uncertainties

Heidi M. Connolly, William R. Miranda, Alexander C. Egbe, and Carole A. Warnes

66 Mechanical Support for Patients With Congenitally Corrected Transposition of the Great Arteries and End-Stage Ventricular Dysfunction

Kyle W. Riggs, Satsuki Fukushima, Tomoyuki Fujita, Raheel Rizwan, and David L.S. Morales
