The scope of *The American Journal of Emergency Medicine* is as broad as the definition of emergency medicine itself, encompassing all activities concerned with acute medical care. *AJEM* invites the submission of original research, reports, correspondence, and opinion relating to acute adult and pediatric medicine and surgery and the related fields of trauma, toxicology, critical care, resuscitation, emergency medical services, behavioral emergencies, and environmental medicine.

Original contributions will be accepted on the basis of significance, validity, and clarity. Authors will be expected to justify conclusions by the evidence presented, maintain a lucid prose style, and describe methodology in sufficient detail for readers to evaluate results accurately. *AJEM*, in turn, is committed to a confidential, expeditious, and professional editorial process. Reviews will be objective, rigorous, and responsible.

Articles published in *AJEM* are indexed and abstracted in Index Medicus, Excerpta Medica, Current Contents/Clinical Medicine, ISI/BIBLIOMED, and BIOSIS.

For the convenience of prospective authors, *AJEM* is a participating journal in the International Committee of Medical Journal Editors’ "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (*N Engl J Med* 1997;336:309-315). This agreement provides for a standardized manuscript format, allowing authors to submit articles to any one of over 500 scholarly medical publications without revision simply to accommodate the vagaries of any individual journal’s technical and stylistic requirements.

**REVIEW POLICY**

All original contributions, investigations, and reports will be subjected to multiple-peer review. Case reports will receive desk review only. To protect the integrity and anonymity of the review process, all reviews will be conducted in double-blinded fashion. To promote quality composition and investigation, legible comments from all referees will accompany returned manuscripts. To encourage criticism, correspondence, and open discussion of controversial issues, letters to the editor will be printed promptly. As a courtesy to contributors and to ensure the timeliness of *AJEM*’s content, authors will routinely be notified of the action taken upon their manuscripts within 10 weeks of submission. Rejection rates will receive expedited in-house review and will be accepted or rejected without specific comments. All submissions must be reviewed and edited by a native English speaker before submission to *AJEM* or the manuscript will be returned without review.

**GUIDE FOR AUTHORS**

For a full and complete Guide for Authors, please go to: http://www.elsevier.com/wps/locate/0735-6757. We invite submissions on clinical and laboratory research and topics pertinent to adult and pediatric emergency medicine including emergency medical and health services, trauma, toxicology, resuscitation, behavioral emergencies, critical care, and environmental medicine. In general, *AJEM* does not publish surveys, papers that focus on patient satisfaction, quality assurance, didactics, or data sets that do not include any recent (< 3 years old) data. The following are journal features for which we invite submissions:

- **ORIGINAL CONTRIBUTIONS**: Reports of new clinical and laboratory investigations and research. Original Contributions should contain a power analysis to ensure adequate sample size. Research involving proprietary devices can only be submitted and considered as Correspondence (see below).

- **BRIEF REPORTS**: Short papers, series of cases, and preliminary reports of work in progress; studies with small numbers pointing to the need for further investigation. Brief reports should be limited to 2,000 words of text (exclusive of tables, references, and figure legends).

- **RESEARCH SEMINARS**: Discussions of the history, methodology, and future of a particular area or subject in emergency medicine research.

- **REVIEWS**: Definitive, in-depth, state-of-the-art reviews of clinical and research subjects. Unsolicited reviews are not generally published in *AJEM*. Before submitting any unsolicited reviews, please forward an outline to the Editor for consideration.

- **THERAPEUTICS**: Detailed reviews of important devices and drugs used in the practice of emergency medicine.

- **DIAGNOSTICS**: Detailed review of new diagnostic approaches, imaging modalities and tests important to Emergency Medicine practice.

- **CONTROVERSIES**: Editorial viewpoints on current controversies.

- **CORRESPONDENCE**: Letters to the editor are limited to 800 words of text (exclusive of references, tables, and figure legends). These submissions should not contain an abstract.

**CASE REPORTS**: Case reports will receive desk review only without comment. Case reports must describe a case unique to the emergency medicine literature (authors are expected to conduct a literature search before submission) and involve outpatient emergency department care. The text should be limited to <800 words and the abstract <250 words. Reports of ultrasound findings are generally not accepted for publication. Accepted case reports in their entirety will be published digitally at our web site (www.ajemjournal.com), while the abstract will be published in each printed issue.

**Cover Letter**

The cover letter accompanying all submitted manuscripts must be signed by all authors (or have separate cover letters so that all authors have signed a letter). (Authors may submit electronic signatures.) The cover letter(s) containing original signatures should be scanned and submitted electronically along with all the other files relating to the manuscript. This letter must contain the following language: “The manuscript, as submitted or its essence in another version, is not under consideration for publication elsewhere, and will not be published elsewhere while under consideration by AJEM. The authors have no commercial associations or sources of support that might pose a conflict of interest. All authors have made substantive contributions to the study, and all authors endorse the data and conclusions.” Authors with a potential conflict of interest should cite it in the cover letter.

**Author Responsibility**

Submissions are reviewed for possible publication with the understanding that they are original and not simultaneously under consideration by another journal. Accepted manuscripts become the property of AJEM and may not be published elsewhere without the written permission of AJEM. Any material previously published elsewhere must be accompanied by written consent of its author and publisher when submitted to AJEM. Photographs of an identifiable subject should be accompanied by a release signed by the subject or responsible party authorizing publication. If required, institutional clearance to publish should be submitted with the manuscript. AJEM is not responsible for statements made by any contributor. Authors should keep copies of all submitted materials. Photographs and figures are not returned, even if a manuscript is not accepted.

**Repetitive Publication**

Authors submitting papers to this journal must confirm that the paper, as submitted or its essence in another version, has not been published elsewhere, is not under consideration for publication elsewhere, and will not be published elsewhere while under consideration by AJEM. Prior publication of some content of the paper may not preclude the paper’s publication in AJEM. Authors must provide full information in the cover letter sent with the submitted manuscript on any possibly repetitive publication of content, including: (1) reworked data already reported; (2) cases or subjects in a study cohort already described in a published report; (3) previously reported single-dose data; and (4) content already published or to be published in another format such as the proceedings of a meeting or symposium, a chapter in a book, or a letter to the editor; (5) content published in a language other than English.

**Conflict of Interest**

Authors are expected to disclose any commercial associations or sources of support that might pose a conflict of interest in connection with the submitted article. All funding sources supporting the work must be acknowledged on the title page and at the end of the manuscript. All financial involvement in any organization or entity with a financial interest in the subject matter or materials of the research discussed (eg, employment, consultancies, stock ownership or other equity interest, patent-licensing arrangements) must also be acknowledged on the title page and at the end of the manuscript.

**Human Research and Informed Consent**

Manuscripts reporting the results of experimental investigations, regardless of location/nation, must include a paragraph in the cover letter and a statement in Methods indicating approval by the institution’s Human Research Committee.

**Manuscripts Submitted from Outside the US**

Authors whose first language is not English must have their submissions certified as being edited by a professional American English editorial service. Documentation/certification of such editing must be uploaded as a separate file when submitting the manuscript.
