World Airway Management Meeting 2019

Dear editor

We are delighted to announce the second World Airway Management Meeting (WAMM) will take place in the beautiful city of Amsterdam from the 13th – 16th November 2019.

Following the inaugural WAMM 2015, the UK-based Difficult Airway Society (DAS) and the North-American-based Society for Airway Management (SAM) and the European Airway Management Society (EAMS) combine their annual scientific meetings to producing a highly successful world class congress. WAMM 2019 promises an eclectic programme of lectures, workshops and social events for a world-wide and world-class airway management related meeting in Amsterdam.

The organising committee hope to bring you an amazing programme including keynote speakers of worldwide repute, simulation & airway workshops. In addition there will be an opportunity to meet experts in a variety of areas in smaller sessions. There have been amazing innovations in this field in the past 10 years and many of the people involved have agreed to attend and to share their experiences with us. Also our partners in industry, who have supported the advances we have made, are already signing up and helping to make this a world class event. Target audience are all health care professionals involved in airway management. It will be a truly multidisciplinary event.

So please join us to celebrate where airway management has come over the past 20 years and look ahead to an exciting future of innovations and developments in this important area which is integral to what we do

Look forward to seeing you in Amsterdam in 2019!
