

# Trends in Parasitology

September 2019, Volume 35, Number 9, pp. 665–740

## Science & Society

- 665 **Rethinking Graduate Education in Parasitology: A Case Study** *Derek M. McKay, Mindi Summers, Andre G. Buret, Teresa Emmett, and John S. Gilleard*

## Spotlights

- 668 **Bed Nets, Insecticides, and Antimalarials: Where to Next?** *Hayley D. Buchanan, Geoffrey I. McFadden, and Christopher D. Goodman*
- 671 **Combining Sterile and Incompatible Insect Techniques for *Aedes albopictus* Suppression** *George Dimopoulos*

## Forum

- 673 **The Uncertainty Surrounding the Burden of Post-acute Consequences of Dengue Infection** *Trinh Manh Hung, Bridget Wills, Hannah E. Clapham, Sophie Yacoub, and Hugo C. Turner*

## Opinions

- 677 **Targeting Pregnant Women for Malaria Surveillance** *Alfredo Mayor, Clara Menéndez, and Patrick G.T. Walker*
- 687 **The Symbiotic Spectrum: Where Do the Gregarines Fit?** *Sonja Rueckert, Emma L. Betts, and Anastasios D. Tsaousis*
- 695 **Foodborne Parasites in Europe: Present Status and Future Trends** *Chiara Trevisan, Paul R. Torgerson, and Lucy J. Robertson*

## Reviews

- 704 **Mosquito Host-Seeking Regulation: Targets for Behavioral Control** *Laura B. Duvall*
- 715 **Noncoding RNAs in Parasite–Vector–Host Interactions** *Chaima Bensaoud, Michael Hackenberg, and Michail Kotsyfakis*

(Contents continued)

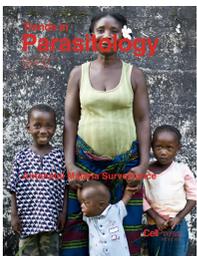

725 **Evolutionary Insights into the Tick Hologenome**

*Sandra Díaz-Sánchez,  
Agustín Estrada-Peña,  
Alejandro Cabezas-Cruz,  
and José de la Fuente*

**Parasite of the Month**

738 ***Echinococcus multilocularis***

*Adriano Casulli, Thomas F.E. Barth,  
and Francesca Tamarozzi*

**On The Cover:** As a generally healthy and accessible population, women at antenatal care clinics provide valuable information for monitoring trends in infectious diseases. In this issue of *Trends in Parasitology*, Mayor *et al.* describe the motivations and challenges to introduce routine malaria surveillance amongst women attending antenatal care in sub-Saharan Africa.
