

Acknowledgement to reviewers 2018

Published online: 8 February 2019

© Springer-Verlag GmbH Germany, part of Springer Nature 2019

The Editors of *Virchows Archiv* are most grateful to all of the colleagues who contributed to another year of success in pathology publishing. The invaluable effort in providing a timely and accurate reviewing process is one of the many ways in which scientists and clinicians have helped boost the impact of our journal. However, no success could be achieved without the steadily increasing input of submitted original results, review articles and guideline papers by the community of pathologists. The Editorial Team wishes to acknowledge the contributions of our expert reviewers, and hopes to call on their knowledge again in 2019.
